Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVBS101, Applied Mathematics I
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	3/1
Credits	4
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVBS101_1	Solve the system of linear equations by using matrix method and numerical techniques.
2CVBS101_2	Calculate Eigen values and Eigen vectors and power of matrix by using Cayley-Hamilton theorem
2CVBS101_3	Fit the curves for bivariate data by applying least square techniques.
2CVBS101_4	Apply Taylor series to find the expansion of functions.
2CVBS101_5	Compute the n^{th} power and roots of the complex number by using De-Moivre's Theorem.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Matrices and Solution of Linear System Equations: Rank of a matrix, Normal form of a matrix, echelon form, Consistency of linear system of equations (system of homogeneous and non-homogeneous linear equation).	07
Unit 2	Eigen Values and Eigen Vectors: Vectors, Linear dependence and linear independence of vectors, Eigen values, Properties of Eigen values, Eigen vectors, Properties of Eigen vectors, Cayley-Hamilton Theorem (Inverse and Higher powers of matrix).	08
Unit 3	Numerical Solution of System of Simultaneous Linear Equations: Gauss Elimination Method, Gauss-Jordan Method, Iterative Method – Gauss Jacobi method and Gauss Seidel method, Eigen value using Power method.	06
Unit 4	Statistics and Curve fitting: Method of Least Squares, Fitting of Straight Line, Fitting of Parabola, Fitting of exponential curves, Lines of Regression.	06
Unit 5	Expansion of Functions and Indeterminate Forms: Taylor's series, Maclaurin's series, Standard expansions, Expansion of function using Standard series, Indeterminate forms.	07
Unit 6	Complex Numbers: De Moivre's theorem, Roots of a complex number, Expansion of $\sin(nx)$ and $\cos(nx)$ in powers of $\sin x$ and/or $\cos x$, Circular functions of a complex variable, Hyperbolic functions, relation between circular and hyperbolic functions, Inverse Hyperbolic functions.	08

Head of Department

Sr. No.	Title of Tutorials
1	Matrices and Solution of Linear System Equations: Normal form, system of homogeneous linear equation.
2	System of non- homogeneous linear equation.
3	Eigen Values and Eigen Vectors.
4	Cayley-Hamilton Theorem.
5	Numerical Solution of System of Simultaneous Linear Equations:
6	Curve Fitting I: Fitting of Straight Line and Fitting of Parabola.
7	Curve Fitting II: Fitting of exponential curves and Lines of Regression.
8	Expansion of function.

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVBS102, Applied Physics
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	3/0
Credits	3
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVBS102_1	Apply suitable optical theory to determine wavelength and divergence of monochromatic and polychromatic sources of light using relevant optical methods of testing.
2CVBS102_2	Calculate the interplaner spacing, lattice constant and properties of unit cell for a given crystal system based on the crystallographic study using laws of material science.
2CVBS102_3	Use concept of Nanotechnology to express Production technique and tools of nano material using different synthesis methods and microscopes.
2CVBS102_4	Solve engineering problems based on Architectural acoustics and Ultrasonic's using appropriate theories and formulae.
2CVBS102_5	Apply principles of Quantum mechanics to calculate observables on known wave functions using fundamental quantum mechanical processes in nature.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Wave Optics : Diffraction:- Introduction, construction of plane diffraction grating, Diffraction at multiple slits, Determination of wavelength of particular colour using plane diffraction grating, Resolving power of grating, Numericals. Polarization:- Polarization of light, Polarization by double refraction, Positive and Negative crystals, Optical activity, Laurent's half shade Polarimeter, Numericals.	06
Unit 2	Laser and Fibre Optics : Laser: Introduction to laser, Laser and ordinary light, Interaction of radiation with matter- Absorption, Spontaneous emission, Stimulated emission, Pumping (Three level and four level), Population inversion, Metastable state, Laser beam Characteristics, Solid State laser (Ruby Laser), Industrial and medical applications of laser, Holography- Difference between ordinary photography and Holography, Construction and reconstruction of Hologram. Optical fibre: Introduction, Basic principle (total internal reflection), Structure of optical fibre, Propagation of light through optical fibre, Acceptance angle and acceptance cone (no derivation), Fractional refractive index change, Numerical aperture (no derivation), Classification of optical fibre, Advantages and disadvantages of optical fibre, Applications of optical fibres, Numericals.	08

Head of Department

Dean Academics

Director

Executive Director

Unit 3	Structure of Solids and its Characterization: Crystalline state, Lattice, Space lattice, Basis and crystal structure, Unit cell, lattice parameters, Crystal system in brief, (Cubic, Monoclinic...Triclinic), Fourteen Bravais lattices, Properties of unit cell (number of atoms per unit cell, coordination number, atomic radius, packing fraction), Calculation of lattice constant (Relation between lattice constant and density), Symmetry elements in cubic crystal, Miller indices:- Procedure, Features and Sketches for different planes. X-ray diffraction (Laue method), Bragg's law, Bragg's X-ray diffractometer, Numericals.	08
Unit 4	Nano Physics: Introduction, Concept of nanotechnology, Production techniques:- Top-down (eg. Ball milling) and Bottom-up (eg. Sol-gel process), Tools – Scanning Electron Microscope (SEM) and Atomic Force Microscope (AFM), Applications of nano- materials, Carbon Nano Tube (CNT):- Structure, two types, properties and applications.	06
Unit 5	Architectural acoustics and Ultrasonic : Architectural Acoustics: Introduction, Basic requirements for acoustically good hall, Reverberation, Time of Reverberation, Sabine's formula (no derivation), Absorption coefficient, Factors affecting the architectural acoustics and their remedy, Numericals. Ultrasonic waves: Introduction, Properties of ultrasonic waves, Production of ultrasonic waves by magnetostriction method, Determination of wavelength and velocity of ultrasonic waves by using acoustic diffraction method, Detection of ultrasonic waves, Applications of ultrasonic waves, Numericals. Microwaves- Properties, Advantages, Disadvantages and its applications.	07
Unit 6	Quantum Physics: Introduction to Quantum mechanics, Plank's Quantum Theory, Photoelectric Effect, Compton Effect with theory, Wave Particles Duality, Matter waves, Properties of Matter wave, Heisenberg Uncertainty principle for position and momentum of particle, Problems.	07

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVPC103, Applied Mechanics
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	3/0
Credits	3
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC103_1	Interpret the resultant force and reactions at support for a force system based on concepts of resolution and composition.
2CVPC103_2	Calculate forces in members of truss under point load with their nature.
2CVPC103_3	Compute moment of inertia for a composite plane lamina by using parallel and perpendicular axis theorem.
2CVPC103_4	Apply the concept of dynamic equilibrium for rigid bodies in motion using principle of kinetics.
2CVPC103_5	Illustrate the motion of rigid bodies after impact using principle of conservation of momentum.

Course Contents:

Unit No.	Title	Hrs
Unit 1	Introduction to Engineering mechanics: Basic concepts - Particle, Body, Rigid body, Force, Types of force systems, Law of transmissibility of force, Resolution of a force, Resultant force, Moment of a force, couple, Varignon's theorem.	06
Unit 2	Equilibrium of forces Concept of equilibrium, Conditions of equilibrium, Free Body Diagram, Law of moment, Introduction to surface friction, Types of Loads, Types of supports, Types of Beams, Analysis of Simple and Compound beams using conditions of equilibrium.	08
Unit 3	Analysis of Truss Introduction of roof truss, Types of Trusses, Determinacy of a Truss, Assumptions for analysis of truss, Analysis of truss using method of Joint and method of Section.	07
Unit 4	Centroid and Moment of Inertia Introduction to Centroid and Center of Gravity, Centroid of plain laminae, Moment of Inertia, Moment of Inertia of Standard shapes from first principle, Parallel and perpendicular axis theorem, Moment of Inertia of plain and composite figures, Radius of Gyration.	07
Unit 5	Kinetics of Linear and Circular motion Equation of linear motion and motion under gravity, Introduction to surface friction, Kinetics of linear motion, D' Alembert's Principle, Work- Energy Principle, Impulse Momentum Principle, Kinetics of Circular Motion, Torque.	08

Head of Department

Dean Academics

Director

Executive Director

Unit 6	Collision Introduction to Phenomenon of Collision, Law of Conservation of Momentum, Newton's law of Collision of Elastic Bodies, Coefficient of Restitution, Types of Collisions, Direct Collision of Two Bodies, Loss of Kinetic Energy During Collision.	06

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVES104, Engineering Graphics
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	2/0
Credits	2
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVES104_1	Sketch projection of simple geometries (curves & Planes).
2CVES104_2	Sketch projection of solids & its sectional views.
2CVES104_3	Produce the orthographic projection.
2CVES104_4	Produce the isometric projection.
2CVES104_5	Prepare Perspective drawing of simple objects.

Course Contents:

Unit No.	Title	Hrs
Unit 1	Fundamental of engineering graphics : Introduction to drawing instrument and their uses. Different types of lines used in drawing practice, the dimensioning system as per BSI. Engineering Curves: Introduction to First angle and third angle methods of projection. Construction of curves used in drawing only Ellipse, Hyperbola and Parabola.	04
Unit 2	Projections of Solids Projections of Prisms, Pyramids, Cylinder and Cones inclined to both reference planes. (Excluding Frustum and Sphere)	06
Unit 3	Sections of Solids : Prisms, Pyramids, Cylinders and Cones in simple positions and inclined to one reference plane and parallel to other.	04
Unit 4	Orthographic projection- Lines used, selection of views, the spacing of views, dimensioning and sections. Drawing required views from given pictorial views (conversion of pictorial views into orthographic views). Including sectional orthographic views	06
Unit 5	Isometric Projections Introduction to isometric. Isometric scale, Isometric projections and Isometric views /drawings. Circles in isometric view. Isometric views of simple solids and objects.	04
Unit 6	Perspective Views Introduction, Simple Objects for Perspective Drawing.	04

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS105, Professional Communication Skills
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/4
Credits	2
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS105_1	Exhibit the skill of sentence construction considering the frame of English language rules accurately for effective and sound communication.
2CVHS105_2	Present their portfolio confidently considering SWOT analysis by using digital tools convincingly as per the corporate expectations.
2CVHS105_3	Write formal letters proficiently by following required techniques that helps in maintaining professional affairs at workplace.
2CVHS105_4	Produce professional presentations proficiently on assigned topics in convincing manner using necessary tools and techniques.
2CVHS105_5	Justify own role in communicative events with balanced zeal, in well-organized manner.

List of Experiments

Exp. No.	Title of Experiments
1	Checking My English Communication
2	Self - Introduction
3	Presenting my Career Choices
4	Preparing my Portfolio
5	Enriching Vocabulary
6	Avoiding Common Errors
7	Presenting My Portfolio
8	Note Making
9	Getting Smart with Technical Description of charts/ Images/ Processes
10	Delivering Professional Presentation
11	Application and Resume Writing
12	Email Writing
13	GD (General)
14	Introducing Guest/ Friend
15	Extempore
16	GD (Technical)
17	Mock Interview
18	Organizing an Event

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVBS106, Applied Physics Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVBS106_1	Apply suitable optical theory to calculate wavelength and divergence of monochromatic and polychromatic sources of light using plane diffraction grating.
2CVBS106_2	Calculate band gap energy and Specific rotation for a given semiconductor and sugar solution using appropriate theories and formulae.
2CVBS106_3	Demonstrate symmetries, planes and properties of unit cell for a given crystal system based on the crystallographic study using laws of material science.
2CVBS106_4	Communicate effectively about laboratory work both orally and writing.
2CVBS106_5	Practice professional and ethical behavior to carry forward in their life.

List of Experiments

Exp. No.	Title of Experiments
1	Plane Diffraction Grating
2	Resolving power of Grating
3	Resolving power of telescope
4	Laurent's Half Shade Polarimeter
5	Kund's tube for determination of velocity of sound
6	Divergence of The LASER Beam
7	Wavelength of LASER
8	Inverse Square Law
9	Band Gap energy
10	Seven Crystal System
11	Symmetry Element of Cube
12	Numerical aperture of optical fibre
13	Double Refraction
14	Material Characterization using ultrasound.

Minimum **EIGHT** experiments should be perform from the above list.

Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVES107_1	Compute resultant and moments of a force system to verify the laws for forces for static state of body.
2CVES107_2	Relate the magnitude of support reactions of a simply supported beam using experimental and analytical method.
2CVES107_3	Choose the position of centroid for a plane lamina by using experimental method.
2CVES107_4	Interpret forces in the members of truss using experimental and analytical method.
2CVES107_5	Calculate the coefficient of friction of different material surfaces.

List of Experiments

Exp. No.	Title of Experiments
1	To verify law of polygon of forces using force table.
2	To verify lami's theorem using force table.
3	To verify law of moments by Bell crank lever.
4	To calculate support reactions of beam.
5	To compute centroid of plain lamina.
6	To calculate coefficient of friction of different material surfaces.
7	To find out support reactions of a beam by graphical method.
8	To calculate forces in member of truss with their nature.

Course Code and Course Title	2CVES108, Engineering Graphics and CAD Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/4
Credits	2
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVES108_1	Prepare drawing of Points, lines, Planes using Auto Cad.
2CVES108_2	Plot projection of solids.
2CVES108_3	Produce the orthographic projection.
2CVES108_4	Plot the isometric projection.
2CVES108_5	Prepare sectional view of solids.

Course Contents:

Unit No.	Title	Hrs
Unit 1	Introduction to AutoCAD Introduction & Review of Previous knowledge Capability of AutoCAD Starting AutoCAD Various Visualization commands Documentation Quick tour Creating and Accessing documentation Layout and plotting Concept of hardware & software	06
Unit 2	Getting started (Principle & Concept) Starting AutoCAD. AutoCAD & interface Setting new drawing. Accessing command Opening & saving existing file & function keys etc.	04
Unit 3	Creating objects (coordinate system) Co-ordinates system and their type. Drawing line objects. Drawing curve objects and solid filled areas.	04
Unit 4	Editing methods and controlling drawing display Working with named objects Editing objects using the object property tool bar and various method. Zooming & Panning drawing, redrawing screen, regenerating the drawing.	06

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Basic dimensioning geometric dimensioning & tolerancing. Adding text to drawing Need for Dimensioning. Detailed discussion on Dimensioning and tolerance method in AutoCAD Editing method. Adding text with various engineering symbols.	04
Unit 6	Perspective drawing	04

List of Experiments	
Exp. No.	Title of Experiments
1	Computer aided drafting of Curves.
2	Computer aided drafting of solids upto hexagonal base shape and cylindrical/ Conical shape inclined to the reference planes.
3	Computer aided drafting of orthographic vies of simple 3d objects. (04)
4	Computer aided drafting of Isometric view.
5	Plotting of perspective views of given solids or small 3D objects.

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVES109, Design Thinking Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	1/0/2
Credits	2
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVES109_1	Apply the design thinking techniques to empathize the customer through arranging survey and/or interview.
2CVES109_2	Identify and Formulate the solution for real world problem using design thinking technique.
2CVES109_3	Create and Exhibit Prototype, for defined problem using design thinking approach.
2CVES109_4	Test developed prototype for defined problem to meet user's requirements.
2CVES109_5	Adapt ethical practices and professional skills to provide a reliable solution for defined real world problem through participating in team activities.

Unit No.	Content	Hrs.
Unit 1	Introduction to Design Thinking, Design Thinking Process	02
Unit 2	Empathize Phase: Empathy and Ethics, User Perspective, Activities – Empathy Map, Planning, Persona building.	02
Unit 3	Customer Journey Mapping, Observation of stakeholders, Defining and Conceptualization of problem	02
Unit 4	Ideation, Activities – 5 Whys & 1 How, Story boarding, Brainstorming.	02
Unit 5	Prototype – Types, Mindsets, Tools.	02
Unit 6	Testing – Scenario, Methods, Refinements & Recommendations.	02

Expt. No	Title of the Experiment
1	Identification and Selection of Problems
2	Designing of Empathy Map
3	Customer Survey and Analysis
4	Persona Building
5	Customer Journey Map
6	Defining the problem
7	Poster Presentation
8	Ideation
9	Prototype Building
10	Testing

Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110A_1	Improve physical fitness.
2CVHS110A_2	Understand the basic rules and how they can play the game of badminton.
2CVHS110A_3	Provide opportunities for playing modified games to promote student learning
2CVHS110A_4	Develop students' critical thinking skills, problem solving skills, self-management skills, collaboration skills, risk assessment etc.
2CVHS110A_5	Learn various technical motor skills in badminton and how you can move better in the court.
2CVHS110A_6	Acquiring a satisfactory level of knowledge and experience of the sport, to enable students to play by themselves for recreation.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to badminton – Aim – Objectives – Short reference in Badminton history Understand the basic rules and how they should play normal game.	04
Unit 2	Skills - Service, Net shot, Clear, Drop, Smash. Skills - Service Forehand & Backhand, Net shot, Drive (Presentation and practice to the court)	06
Unit 3	Skills – Clear, Drop, Smash Implementation of singles rules	05
Unit 4	Footwork 1 Footwork 2	05
Unit 5	Implementation of doubles rules. Forehand strokes. Motor skills practice 1	06
Unit 6	Motor skills practice 2 Motor skills practice 3 Motor skills practice 4	04

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110B, Volley Ball
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110B_1	To send the ball over the net, according to the regulations, to the ground on the opponents ground
2CVHS110B_2	The ball is put into play through the service right back player within the service zone
2CVHS110B_3	The Ball must hit with one hand or one arm and directly send over the net opponent's court.
2CVHS110B_4	To valley the ball over the net before it touches on the ground
2CVHS110B_5	The players use their hands to volley the ball.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction & Understand basic volleyball rules, terminology, and scoring procedures.	04
Unit 2	Demonstrate basic skills associated with volleyball, including passing, setting, serving, attacking (spiking), and blocking.	06
Unit 3	Demonstrate the ability to perform individual offensive and defensive skills and strategies.	05
Unit 4	Demonstrate an understanding of the typical game sequencing: serve, pass, attack, defense, transition, and defense.	05
Unit 5	Understand and apply the knowledge of basic rules of volleyball. Skill Practice	06
Unit 6	Demonstrate proper etiquette and good sportsmanship. And Skill related Practice. Skill Practice	04

Director

Executive Director

Course Details:

Class	F.Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110C, Kabaddi
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110C_1	Acquire, analyze and interpret basic skills
2CVHS110C_2	Appraise the rules and regulation.
2CVHS110C_3	Demonstrate and assess various basic skills/techniques and game strategies.
2CVHS110C_4	Develops confidence, concentration and tolerance in players.
2CVHS110C_5	This game also Provides an opportunity for healthy competitions among equal players and help them make friends.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Kabaddi – Aim – Objectives – Short reference in Kabaddi history Understand the basic rules and how they should play normal game.	04
Unit 2	Demonstrate basic skills associated with Kabaddi, including pushing, Bonus, Tackling, attacking, and blocking	06
Unit 3	Demonstrate an understanding of the typical game sequencing: service, Bonus, attack, defense, Raiding and defense.	05
Unit 4	Demonstrate the ability to perform individual offensive and defensive skills and strategies. Stepping Practice.	05
Unit 5	Skill Demo – Stepping, Bonus, Foot touch, Toe touch, Thrust, Squat leg, Kicks & Practice.	06
Unit 6	Skill Practice And Shadow Practice	04

Head of Department

Dean Academics

Director

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110D, Foot Ball
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110D_1	By applying these principles through active participation, students develop the necessary Skills and knowledge to play football.
2CVHS110D_2	Provides students with opportunities to improve physical fitness acquire knowledge of fitness concepts and practice positive personal and social skills.
2CVHS110D_3	Students will gain an understanding of how a wellness lifestyle affects one's health, fitness and physical performance

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Football – Aim – Objectives – Short reference in Football history Understand the basic rules and how they should play normal game.	04
Unit 2	Introduce students to the basic skills and knowledge associated with football. Understand basic football rules, terminology, and safety concerns.	06
Unit 3	Demonstrate the basic football skills of passing, three point stance, catching, blocking, hand-offs, punting, the carry and kicking & Practice.	05
Unit 4	Demonstrate the ability to perform individual offensive and defensive skills and strategies.	05
Unit 5	Improve personal fitness through participation in yoga, muscular strength, muscular endurance, and flexibility activities & Practice.	06
Unit 6	Successfully participates in skill improvement and offensive game strategies & Practice	04

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110E, Bharatnatyam Classical Dance
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110E_1	Interpolation of Indian classical dance forms & basic types of Bharatnatyam.
2CVHS110E_2	Subdivide bharatnatyam in terms of Nrutt, Nrutya & Nattya.
2CVHS110E_3	Show the perform base on signal & combine hand posture in terms of Ganesh Vandana & Mahalaxmi Ashtak

Course Contents:

Unit No.	Title	Hrs.
Unit 1	History of Bharatnatyam Dance style & information about all Indian classical dance forms.	01
Unit 2	Basic types of Bharatnatyam :- Tatty Advu, Natty advu, Vishru advu, Kuddit Mett advu, Mett advu, tatti kuddit mett advu & Tirmanam (small). Study of Navras Abhinay. Singal Hand posture , Footwork , Shirobhed(head movement),	10
Unit 3	Combine Hand posture. Meaning of Guruvandna, Ganesh, mahalaxmi shlok. Definition of Nrutt, Nrutya & Nattya.	06
Unit 4	Practical session of Ganesh vandna Shlok in classical music.	06
Unit 5	Practice Sessions. & Presentation Of Ganesh vandna	07
Unit 6	History of Bharatnatyam Dance style & information about all Indian classical dance forms.	01

Class	F.Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110F, Harmonium Classical Music
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110F_1	Outline in History Harmonium & different Raags.
2CVHS110F_2	Perform on different songs
2CVHS110F_3	Role play the different music by means of harmonium.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	History & Introduction of Harmonium.	02
Unit 2	Harmonium presentation of Raag :- Bhoop raag / Bhimpalash raag.	12
Unit 3	Practice sessions.	03
Unit 4	Practice song notations & Harmonium Dhoon (percussion)	08
Unit 5	Practice sessions & students presentations	05
Unit 6	History & Introduction of Harmonium.	02

Dean Academics

Director

Executive Director

Course Details:

Class	F.Y. B. Tech, Sem.-I
Course Code and Course Title	2CVHS110G, Indian Folk Dance
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110G_1	Discuss different types in Indian Folk dance.
2CVHS110G_2	Demonstrate Navras Abhinay, Tribal dance, Dhangari & Lavni dance.
2CVHS110G_3	Compose dance on different folk dance style.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Indian Folk dance & its forms.	02
Unit 2	Basic steps of folk dance styles.	03
Unit 3	Importance of expressions (Acting) in dance, Navras Abhinay & its types. (9 type of navras)	03
Unit 4	Tribal dance, & its different styles.	06
Unit 5	Practice sessions.	04
Unit 6	History of Dhangari & Lavni dance. Types of dhangari & lavni dance.	01
Unit 7	Steps (dance composition) of Dhangari & Lavni dance.	07
Unit 8	Practice sessions & Students performance	04

Course Details:

Class	F.Y. B. Tech, Sem.- I
Course Code and Course Title	2CVHS110H, Karaoke Singing.
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS110H_1	Understand notation of the songs.
2CVHS110H_2	Perform happy, sad, love devotional, patriotic songs.
2CVHS110H_3	Compose songs in many variations.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Song Notation	04
Unit 2	Happy song / Sad song (classical & semi classical)	08
Unit 3	Love song / Devotional song / Patriotic songs	08
Unit 4	Song composition	05
Unit 5	Practice session & students presentation	05

Head of Department

Dean Academics

Director

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVBS111, Applied Mathematics II
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	3/1
Credits	4
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVBS111_1	Solve problems on partial derivatives by using fundamental concepts of derivative and apply it to find Jacobian, Maxima and Minima of functions of several variables.
2CVBS111_2	Solve Ordinary Differential Equation by using analytical method and numerical techniques.
2CVBS111_3	Use technique of finite difference and interpolation to compute the value of function for given data.
2CVBS111_4	Apply the concept of Special Functions to evaluate improper integrals.
2CVBS111_5	Evaluate proper and improper type of multiple integrals by using fundamental concepts of integration and apply it to find Area and Mass of a given region.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Partial Differentiation and Its Applications: Function of two or more variables, Partial derivatives, Euler's theorem, Change of variables, Jacobin, Maxima and minima of functions of two variables.	08
Unit 2	Ordinary Differential Equation (First order and First degree): Linear differential equation, Equation reducible to linear differential equation, Exact differential equation, Equation reducible to exact equation.	07
Unit 3	Numerical Solution of Ordinary Differential Equation (First order and First degree): Picard's method, Taylor's series method, Euler's method, modified Euler's method, Runge-kutta method.	06
Unit 4	Finite Differences and Interpolation: Finite differences, Newton's Interpolation formulae, central difference interpolation formulae (stirling formula), interpolation with unequal interval (Lagrange's formula)	06
Unit 5	Special Functions: Gamma function, Properties of Gamma function, Beta function, Properties of Beta function, Relation between Beta and Gamma functions.	07
Unit 6	Multiple Integral and It's Applications: Double Integrals, Triple integral, Change of Order of Integration, Change to polar, Applications to Area and Mass of plane lamina.	08

 Head of Department

 Dean Academics

 Director

 Executive Director

Sr. No.	Title of Tutorials
1	Partial Differentiation and homogeneous function
2	Applications of Partial Differentiation
3	Linear and non-differential equation.
4	Exact and non-differential equation
5	Numerical Solution of Ordinary Differential Equation
6	Newton's Interpolation formulae: forward and backward difference formulae
7	Central difference interpolation formulae (stirling formula) and Lagrange's interpolation formula.
8	Special functions

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVBS112, Applied Chemistry
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	3/0
Credits	3
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVBS112_1	Apply principles of water testing to identify water quality parameters and methods of water softening using fundamental laws.
2CVBS112_2	Classify fuels and analytical methods to identify their characteristics using basic principles of chemistry.
2CVBS112_3	Select engineering, ceramic materials on the basis of its properties and applications using their chemical composition.
2CVBS112_4	Apply the methods of prevention of corrosion to a given metal considering its types and factors affecting corrosion.
2CVBS112_5	Compute the values of hardness of water and calorific values of fuels using fundamental equations.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Water Technology: Introduction, impurities in natural water, Water Testing: acidity, alkalinity and chlorides, hardness of water (definition, causes and significance), Calculations of total hardness, disadvantages of hard water in domestic and industrial applications. Scales and sludges: Formation in boilers and removal, Treatment of hard water by ion- exchange process, Zeolite process, Desalination of brackish water by Reverse Osmosis.	07
Unit 2	Chemical and Instrumental Techniques: Chemical analysis, its types, Different ways to express concentration of solution. Numerical problems. Standards and its types. pH-metry: Introduction, pH measurement using glass electrode and applications. Spectrometry: Introduction, Laws of spectrometry (Lamberts and Beer-Lambert's law). Instrumentation and applications of UV-Visible spectrophotometer, Chromatography: Introduction, Principle, instrumentation and applications of gas-liquid chromatography (GLC).	07
Unit 3	Engineering Materials: A) Polymers: Introduction, plastics, thermo-softening and thermosetting plastics, industrially important plastics like phenol-formaldehyde, urea formaldehyde. Conducting polymers, biodegradable polymers (properties and applications), composites, fibre-reinforced plastics (FRP) and glass reinforced plastics (GRP). B) Lubricants: Introduction, classification of lubricants (solid, semisolid and liquid), lubrication and its types, characteristics of lubricants: viscosity, viscosity	07

Director

Executive Director

	index, flash point, fire point, cloud point and pour point.	
Unit 4	Fuels and Non-conventional Energy Sources: Fuels: Introduction, classification, characteristics of good fuels, comparison between solid, liquid and gaseous fuels, types of calorific value (higher and lower), Bomb calorimeter and Boy's calorimeter. Numericals on Bomb and Boy's calorimeter. Batteries: Introduction, Characteristics of a battery, Rechargeable Li- ion batteries (Diagram, charging-discharging reactions, advantages and applications). Fuel Cells: Introduction, H ₂ -O ₂ Fuel cell (Construction, working and applications), applications of fuel cells.	07
Unit 5	Corrosion & Green Chemistry: Corrosion: Introduction, causes, types, Atmospheric corrosion (oxidation corrosion), Electrochemical corrosion (hydrogen evolution and oxygen absorption mechanism), factors affecting rate of corrosion. Prevention of corrosion by proper design and material selection, hot dipping (galvanizing and tinning), cathodic protection method, electroplating, metal cladding. Green Chemistry: Definition, Twelve principles of green chemistry, Research and industrial applications.	07
Unit 6	Metallic & Ceramic Materials: Alloys: Introduction, alloy definition and classification, purposes of making alloys. Ferrous alloys: Plain carbon steels (mild, medium and high). Nonferrous alloys: Copper alloy (Brass), Nickel alloy (Nichrome), Aluminum alloy (Duralumin and Alnico). Ceramic Materials: Introduction, types of ceramics, types of cement & their applications, Manufacture of Portland Cement by wet process, Composition of Portland Cement & their functions- a) Chemical composition, b) Compound composition, Setting & hardening of Portland Cement.	07

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVPC113, Fundamentals of Civil Engineering
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	4/0
Credits	4
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC113_1	Develop the components of residential building for a given site condition with the help of building planning rules and regulations
2CVPC113_2	Apply the knowledge of surveying techniques considering the IS code
2CVPC113_3	Discuss the principles of planning with building bye laws and property transaction
2CVPC113_4	Describe aspects of civil engineering field & masonry construction for residential building considering client's requirements
2CVPC113_5	Make use of Transportation, Environmental and Irrigation Engineering in civil engineering sector considering national building code

Course Contents:

Unit No.	Title	Hrs
Unit 1	Introduction to Civil Engineering: Branches & applications of civil engineering, Role of civil engineer, Types of structure, types of loads, Elements & functions of sub structure, types of soil and rocks, concept of bearing capacity, types of foundations, Elements of super-structures and their functions, Concept of Green Building	10
Unit 2	Surveying Principles & Classification of surveys, Dumpy level, Auto Level, Theodolite, Terms used in levelling, levelling instruments, methods of reduction of levels, types of levelling. Contours: Characteristics of contours, use of contour maps. Introduction to EDM and Total station.	06
Unit 3	Building Materials & formwork: Applications and properties of the following building materials: Bricks, Steel, Cement, Aggregate, Plastic, Aluminium, Water, M.S., S.S., FRP sheets, Gypsum, wood, glass, stone, tiles, bitumen, ceramic Formwork: Requirement, economy and material	12
Unit 4	Masonry: Stone masonry - Random Rubble, Uncoursed Rubble, Coursed Rubble and Ashlar Masonry. Brickwork and Brick Bonds - English, Flemish, and Rat trap bond (one- brick thick). Composite masonry, various types of composite masonry walls Arches: Technical terms in arches, types of arches. Lintel: Necessity, types of lintels Basic requirements of a building as a whole:	11

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVES114, Basic Electrical Engineering
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial	2/0
Credits	2
Evaluation Scheme: ISE / MSE / ESE	40 / 30 / 30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVES114_1	Explain basic terminologies related to DC, AC and magnetic circuits to relate the operations of electrical devices using electrical laws.
2CVES114_2	Relate the concepts of AC fundamentals to single-phase and three-phase AC circuits to describe the generation of AC with phasor representation.
2CVES114_3	Demonstrate wiring circuits and earthing systems using circuit diagrams on the basis of different applications & workspaces.
2CVES114_4	Describe the working principle of AC and DC Machines using electromagnetic laws with constructional features & types for various applications.
2CVES114_5	Apply conceptual understanding of AC& DC parameters to solve electrical circuits and provide a solution

Course Contents:

Unit No.	Title	Hrs
Unit 1	DC Circuits Definitions: EMF, Current, Electrical Work, Power, Energy, Ohm's Law, Kirchhoff's Laws, Factors affecting resistance, Analysis of DC Circuits using KCL & KVL [Numerical treatment].	05
Unit 2	Magnetic Circuits Magnetic circuits & definitions, Comparison between Electric and Magnetic circuit, Magnetic Leakage and Fringing, Magnetization (B-H) curve.	04
Unit 3	Fundamentals of AC Circuits Generation of alternating voltage and current, concept of RMS value, Average value, phasor representation, AC circuits- pure R, L, C, and series R-L-C circuits [Numerical Treatment]. Generation of three-phase AC voltage, Advantages of the three-phase system over single-phase system	05
Unit 4	Earthing and Wiring Circuits Concept of earthing, necessity of earthing, plate and pipe earthing, HRC fuse, Simple wiring, Staircase wiring, Godown wiring. [Theoretical treatment only].	04
Unit 5	Single Phase Transformer Working principle of a Transformer, Construction, Core type, and Shell type transformer, EMF Equation, Transformation ratio & applications.	05
Unit 6	Electrical Machines D.C.Motor: Working principle of a DC motor, Construction, Type, and applications.	05

Head of Department

Dean Academics

Director

Executive Director

	Single phase AC motor: Double Field Revolving Theory, Working principle of Split phase I.M, applications. Universal Motor: Construction, working principle, applications. [Theoretical treatment only].

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVBS115, Applied Chemistry Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVBS115_1	Determine the hardness acidity, alkalinity, chloride content using appropriate methods of titration for given sample of water.
2CVBS115_2	Estimate rate of corrosion in acidic and alkaline medium by depreciation of weight.
2CVBS115_3	Use pH meter to determine pH value of given solution and validate the findings with suitable optical method (photo-colorimeter) and graphical methods.
2CVBS115_4	Analyze coal sample, lubricants and aqueous solutions to get the percentage compositions using appropriate methods.
2CVBS115_5	Communicate effectively about laboratory work both orally and writing.

List of Experiments

Exp.No.	Title of Experiments
1	Determination of acidity of water sample. (Neutralization Titration)
2	Determination of alkalinity of water sample. (Acid- Base Titration).
3	Determination of chloride content of water by Mohr's method. (Precipitation Titration).
4	Determination of total hardness of water sample by EDTA method.
5	Determination of moisture, volatile and ash content in a given coal sample. (Proximate analysis)
6	Preparation of Urea-formaldehyde resin.
7	Determination of viscosity of lubricating oil.
8	Estimation of zinc in brass solution (Displacement Titration)
9	Estimation of copper in brass solution (Displacement Titration)
10	Determination of rate of corrosion of aluminium in acidic and basic medium
11	Determination of pH of sample solution by pH meter
12	Determination of calorific value of fuel using Bomb calorimeter.
13	Demonstration of Photo-colorimeter.

Minimum 8 experiments should be performed from the list out of which two experiments should be on instrumental methods.

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVPC116, Fundamental of Civil Engineering Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVPC116_1	Draw building components of residential by using AutoCAD considering requirement of owner
2CVPC116_2	Calculate reduced levels of different points by levelling.
2CVPC116_3	Calculate linear angular and area measurement by Total Station.
2CVPC116_4	Understand the documents required for municipal submission drawing

List of Experiments

Exp. No.	Title of Experiments
1	Determination of reduced levels for different points by HI & Rise and fall method.
2	Angular measurement by using theodolite.
3	Visit to construction site and visit report.
4	Collection of the various documents required for municipal sanctioning of plan
5	Draw various building components- Staircase & openings
6	Draw a line plan of residential building by applying principles of planning.
7	Study of total station and Linear & Angular measurement.
8	Area measurement by using total station.
9	Traversing by total station.

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVES117, Basic Electrical Engineering Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVES117_1	Identify electrical components, equipment, Lamps and different illumination schemes using electrical apparatus & symbols to handle it properly for experimentation.
2CVES117_2	Measure electrical parameters with appropriate measuring instruments on the basis of ratings and type of connections.
2CVES117_3	Demonstrate the circuit laws, perform testing on electric machine to find the solutions with the help of various instruments for domestic and industrial applications.
2CVES117_4	Correlate and comment the observations and results of experiment with different laws to provide solution for given system.
2CVES117_5	Practice safety precautions in day to day life & communicate effectively with ethics about laboratory work both orally and in writing.

List of Experiments

Exp. No.	Title of Experiments
1	Study of electrical components, equipment's, & measuring instruments.
2	Safety Precautions and earthing Test
3	Kirchhoff's Voltage and Kirchhoff's current Law
4	B-H curve for magnetic material
5	RLC Series Circuit
6	Demonstration of different Wiring Circuits
7	Lamps and Illumination Schemes
8	Effect of Temperature on Resistance
9	Load Test on Single Phase Transformer
10	Load Test on DC Shunt Motor.

Course Details:

Class	F. Y. B. Tech, Sem.- II
Course Code and Course Title	2CVES118, Programming for Problem Solving Laboratory
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	1/0/2
Credits	2
Evaluation Scheme: ISE/ESE (POE)	50 / 50

Course Outcomes (COs): Project

Upon successful completion of the project, the student will be able to:

2CVES118_1	Prepare an algorithm and draw a flowchart to accurately solve various mathematical problems by using structured approach.
2CVES118_2	Apply the fundamental concepts like data types, operators, looping constructs to solve mathematical problems by using the decision and looping controls.
2CVES118_3	Develop a C program to demonstrate the modular approach by using the concept of function, structure and pointer.
2CVES118_4	Demonstrate a solution for various mathematical problems by using the fundamental concepts of C.
2CVES118_5	Write , Compile and debug C program for various problem statements by using structured approach.

Course Contents:

Unit No.	Title	Hrs
Unit 1	Introduction to Information Technology Computer, hardware, software, computer generation, I/O devices-CPU-Memory devices-processors-keyboard-printers. Operating systems- introduction, types of OS, Functions of OS.	02
Unit 2	Problem Solving The meaning of algorithms, Flowcharts, Pseudo codes, Writing algorithms and drawing flowcharts for simple exercises, C Program development environment. Importance of 'C' Language, History, Structure of 'C' Program, Sample 'C' Program.	02
Unit 3	C Fundamentals Constants, variables and data types. Operators and expressions, Managing input / output operations, Control statements-Decision making, Case control & Looping Constructs.	03
Unit 4	Array The meaning of an array, one dimensional and two dimensional arrays, declaration and initialization of arrays, reading , writing and manipulation of above types of arrays, multidimensional arrays.	02
Unit 5	Functions Need of user defined functions, elements of User defined functions, defining functions, return values and their types, function calls, function declaration, methods of parameter passing, Scope rule of functions	02

Head of Department

Dean Academics

Director

Executive Director

Unit 6	Structure & Pointers Need of Structure, Defining a structure, declaring and accessing structure variables, structure initialization, copying and comparing structure variables, structures and functions, Unions. Understanding pointers, accessing the address space of a variable, declaring and initialization pointer variables, accessing a variable through its pointer	03
---------------	--	-----------

List of Experiments

Exp. No.	Title of Experiments
1	Write an algorithm and draw flowchart for given problem statement.
2	Program using different data types and operators in C.
3	Program using if, if else and if else if construct
4	program to demonstrate looping constructs(while, for loop, do while)
5	Program using nested loop (for loop, while loop).
6	program to demonstrate one dimensional array
7	program to demonstrate two dimensional array
8	Implement a program to demonstrate user defined functions.
9	program to demonstrate concept of structures in c.
10	program to demonstrate pointers and pointer arithmetic in c.

Course Details:

Class	F.Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119A, Table –Tennis
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119A_1	The students define table tennis game.
2CVHS119A_2	Willingly participates in Table Tennis as a component of an active lifestyle.
2CVHS119A_3	The students explain foot- work in forehand and backhand spin.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction & Understand basic Table Tennis rules, terminology, safety concerns, and scoring procedures.	04
Unit 2	Demonstrate proper court etiquette and good sportsmanship.	06
Unit 3	Demonstrate basic skills associated with table tennis including forehand, backhand, spins, grips & serves.	05
Unit 4	Demonstrate Exposition and Applying forehand and backhand straight strike.	05
Unit 5	Assess current personal fitness levels & Practice.	06
Unit 6	Use a variety of stroke placements to keep opponent moving during a table tennis match. Practice.	04

Course Details:

Class	F.Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119B, Kho-Kho
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119B_1	Helps In Motor Development.
2CVHS119B_2	It helps in social and mental development of the student
2CVHS119B_3	Kho-Kho helps the student to off depression, anxiety, stress and, increase self-esteem.
2CVHS119B_4	It develops team spirit and leadership skill.
2CVHS119B_5	It improves physical fitness.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Kho-Kho – Aim – Objectives – Short reference in Kho-Kho history Understand the basic rules and how they should play normal game.	04
Unit 2	Demonstrate basic skills associated with Kho-Kho, including Fundamental Skills. Chasing Skills- a) Giving Kho b) Taking Direction c) Sudden Change d) Tapping	06
Unit 3	Demonstrate basic skills associated with Kho-Kho, including Fundamental Skills. Chasing Skills-e) Turning Round the Post f) Trapping g) Diving h) Fake Kho i) Late kho & Practice.	05
Unit 4	Demonstrate basic skills associated with Kho-Kho, including Running Skills a) Position on the court b) Avoiding Trapping c) Positioning near post d) Dodging	05
Unit 5	Demonstrate basic skills associated with Kho-Kho, including Running Skills e) Front Dodge f) Back Dodge c) Round the post dodge & Practice	06
Unit 6	Kho-Kho Skills Practice & Matches.	04

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119C, Basket Ball
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119C_1	Introduce students to the basic skills and knowledge associated with basketball.
2CVHS119C_2	By applying these principles through active participation, students develop the necessary skills and knowledge to play basketball
2CVHS119C_3	Provides students with opportunities to improve physical fitness, acquire knowledge of fitness concepts and practice positive personal and social skills
2CVHS119C_4	Students will gain an understanding of how a wellness lifestyle affects one's health, fitness and physical performance.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction & Understand basic basketball rules, terminology, and safety concerns.	04
Unit 2	Demonstrate the six basic basketball skills of a) Running b) Jumping c) Passing d) catching e) Dribbling and f) Shooting.	06
Unit 3	Demonstrate the ability to perform individual offensive and defensive skills and strategies.	05
Unit 4	Understand and apply the knowledge of basic rules of basketball. Skills Practice.	05
Unit 5	Demonstrate proper etiquette and good sportsmanship. Successfully participates in skill improvement and offensive game strategies.	06
Unit 6	Identify and apply injury prevention principles related to aerobic activities. Practice & Matches.	04

Director

Executive Director

Course Details:

Class	F.Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119D, Hand Ball
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119D_1	The student has a basic knowledge of the team values of sports games
2CVHS119D_2	Acquainting with the characteristics and trends in the development of the discipline.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction & Understand basic Handball rules, terminology, and safety concerns.	04
Unit 2	Health and safety rules. Rules for obtaining credit for the course, Reminder of the history, methodology and basic rules of the game, Exercises to improve passing, grips and throws. The game. Reminder of the refereeing rules.	06
Unit 3	Improving the technique of passing and grips in a team setting. Individual ways of freeing oneself from the opponent and the organization of positional attacks with their use	05
Unit 4	Exercises improving feints and individual defense technique. Everyone's defense system. Principles of individual defense & Practice.	05
Unit 5	Improving the technique of passing and grips in a team setting. Individual ways of freeing oneself from the opponent and the organization of positional attacks with their use. The game & Practice.	06
Unit 6	Identify and apply injury prevention principles related to aerobic activities. Practice & Matches	04

Course Details:

Class	F. Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119E, Katthak Classical Dance
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119E_1	Explain Importance of katthak with respect to Indian culture.
2CVHS119E_2	Demonstrate Guruvandana, Tatkar.
2CVHS119E_3	Compose Katthak dance with consideration of classical & semi classical music.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Classical dance katthak & its importance.	01
Unit 2	Guruvandana & Tatkaar. (teen taal)	03
Unit 3	Chakri & Hast-sanchalan	03
Unit 4	Tode. (Tigida-tigdig-thai)	03
Unit 5	Practice sessions.	02
Unit 6	Paran & Tihaei	05
Unit 7	Classical dance on Song	05
Unit 8	Practice sessions.	08

Course Details:

Class	F. Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119F, Tabla Classical instruments
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119F_1	Discover History of table wadan.
2CVHS119F_2	Demonstration of different Taal in table wadan.
2CVHS119F_3	Develop notation on new music with help of table wadan.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	History & Introduction to Tabla Wadan.	01
Unit 2	Tabla presentation of Taal. Tritaal/ Dadra/ Zaptaal/ Kerwa/ Bhajni	05
Unit 3	Practice sessions.	06
Unit 4	Practice with notation ,& Set one song with tabla	08
Unit 5	Practice sessions & students presentations.	10

Executive Director

Course Details:

Class	F. Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119G, Western Dance
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119G_1	Describe History of Western dance & basic of western dance.
2CVHS119G_2	Organize western dance individually as well as group with help of western music.
2CVHS119G_3	Compose western dance on songs.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	History of Western dance style & information about western dance.	02
Unit 2	Basic types of western dance: - worm-up, Hand- legs movements.	04
Unit 3	Teaching Basic style (focus on dance / music / movements, how to control body, emotion/feeling of music/ dance.)	06
Unit 4	Training western dance with music (original dance form of western, free style dance)	08
Unit 5	Dance composition.	05
Unit 6	Practice session , & Students Presentation	05

Class	F.Y. B. Tech, Sem.-II
Course Code and Course Title	2CVHS119H, Yoga
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	0/0/2
Credits	1
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS119H_1	Discuss importance of Yoga with respect to different forms of exercise.
2CVHS119H_2	Perform Different styles of Yoga.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction , importance of yoga, Basic exercise, sun salutation, shavasana taught yogic & excises types	06
Unit 2	Omkar & sleeping position seats (aasn yogic excise type)to teach omkar in a scientific way, to teach mercatasan , makrasan, setubandhan,	04
Unit 3	Opposite sleeping position. Shalabhasan, chakras an, Bhungasan, Makrasan. Pranayam;- Anulom-Vilom,,Bhasarika, Sheetkari, Bhramari, shitali pranayam. Rapid respiration(jalad shwasan)	05
Unit 4	Practice sessions	05
Unit 5	Seats in the sitting position:- padmasan, Wajrasan, Wakrasan, Ardh-machindrasana, Urshtrasan.	04
Unit 6	Seats in Fine Position. (Dand stithi):- Ekpaad vrukrashasan, Veerasan, Patangasan,Trikonasan.	06

S. Y. B. Tech. Structure

SEM III

Course Details:

Class	S.Y. B. Tech, Sem.-III
Course Code and Course Title	2CVBS201, Differential Equations and Calculus
Prerequisite/s	2CVBS101, 2CVBS105
Teaching Scheme: Lecture/Tutorial /Practical	02/01
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVBS201_1	Solve the Linear Differential Equation on Cantilever, Strut and Beam by using analytical method.
2CVBS201_2	Calculate the Area and Volume of given surface by using concept of Vector Calculus.
2CVBS201_3	Construct the Fourier Series of a given functions by using Euler's Formulae.
2CVBS201_4	Make use of partial differential equations to solve Heat and Wave Equation of boundary value problems.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Linear Differential Equations and Its Application Definitions, Complete solution, Operator D, Rules for finding Complementary function, Inverse operator, Rules for finding the Particular integral, Applications of Linear Differential Equations with constant coefficients Cantilever, Strut, Beam.	07
Unit 2	Vector Calculus Introduction, Scalar and vector point functions - vector operator del, Del applied to scalar point functions - gradient, directional derivative, Del applied to vector point functions - Divergence and curl, Line integral, Green's theorem in the plane	06
Unit 3	Fourier Series Introduction, Euler's Formulae, Conditions for a Fourier expansion, Functions having points of discontinuity, Change of interval, Expansion of odd or even periodic functions, Half range series	07
Unit 4	Partial Differential Equations and its Application Introduction, Partial differential equations with separation of variables, Boundary value problems, vibrations of string, One dimensional heat equation.	06

Head of Department

Dean Academics

Director

Executive Director

Sr. No.	Title of Tutorials (13 Hours)
1	Linear Differential Equations.
2	Applications of Linear Differential Equations.
3	Vector Calculus - I (Gradient, directional derivative, Divergence and curl)
4	Vector Calculus – II (Line integral, Green's theorem in the plane)
5	Fourier Series – I (Full Range Series)
6	Fourier Series – II (Half Range Series)
7	Partial Differential Equations
8	Applications of Partial Differential Equations

Class	S.Y. B. Tech, Sem.-III		
Course Code and Course Title	2CVPC202, Structural Mechanics		
Prerequisite/s	2CVPC103		
Teaching Scheme: Lecture/Tutorial /Practical	03/00/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC202_1	Identify various types of stress and strain in various structural elements by using Hooks law.
2CVPC202_2	Draw shear force and bending moment diagrams for beam supports and various loading conditions with the help of different equilibrium condition.
2CVPC202_3	Calculate stresses and deformation of hallow shaft using torsional equation.
2CVPC202_4	Calculate shear stresses and bending stresses for different sections by using flexural formula and shear stress formula.
2CVPC202_5	Calculate critical load for long columns using Eulers theory.
2CVPC202_6	Compute tensile, compressive, bending, shear strength, hardness and shear centre for different loading conditions by using different instruments.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Stress and Strain Introduction to Elasticity, Plasticity, Brittleness and Strength of materials. Types of stresses and strains, stress strain diagrams, Hooke's law, Behavior of composite sections, Stress distribution in the compound bar and bar of varying c/s, temperature stresses. Elastic constants of isotropic materials.	06
Unit 2	Bending moment and shear force in beams Introduction, Relationship between loading, shear force and bending moment, Shear force and bending moment equations, SFD and BMD with salient values for cantilever beams, simply supported beams and overhanging beams considering point loads, UDL, UVL and Couple, calculate reactions and loadings from SFD and BMD (Reverse Method)	07
Unit 3	Torsion Stresses, strains and deformation in determinate and indeterminate shafts of hollow and solid sections of homogenous and composite materials subjected to torque, concept of torsion on beam and slab.	06

Head of Department

Dean Academics

Director

Executive Director

Unit 4	Bending Stresses in Beams Theory of pure bending, Curvature of a beam, Assumptions, flexure formula, Moment of resistance of cross section, Bending stress distribution diagrams for symmetrical and unsymmetrical sections.	07
Unit 5	Shear stresses in Beams Shear Stresses in Beams of various commonly used sections such as rectangular, triangular, T, circular and I section, Concept of Shear Centre.	06
Unit 6	Elastic stability of columns: Introduction – Short and long columns, Euler’s theory on columns, Effective length slenderness ration, radius of gyration, buckling load, Assumptions, derivations of Euler’s Buckling load for different end conditions, Limitations of Euler’s theory, Rankine’s formula and problems.	07

Class		S.Y. B. Tech, Sem.-III	
Course Code and Course Title		2CVPC203, Building Design and Drawing	
Prerequisite/s		2CVPC107	
Teaching Scheme: Lecture/Tutorial /Practical		03/00/02	
Credits		04	
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE / ESE	50/50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC203_1	Make use of air conditioning, building finishes, acoustics, plumbing and electrification phenomenon in residential building considering codal provision of IS :3362-1977
2CVPC203_2	Develop the components of residential building for a given site condition with the help of building planning rules and regulations
2CVPC203_3	Draw the residential building plan for given requirement using principles of planning and building Bye laws.
2CVPC203_4	Draw the municipal and working drawing of residential building by using AutoCAD with the reference of National Building Code.
2CVPC203_5	Prepare the site visit report of residential building with the help of submission and working drawing.
2CVPC203_6	Describe the various types of roof structures and materials commonly used in construction sector as per building Bye laws.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Staircase & Openings: Stairs: Technical terms, requirements of a good stair, uses, types, Materials for construction. Ramps, lifts and escalator. Design of stairs (Dog Legged, quarter turn and Open Well). Doors - Classification, Teak wood Paneled Door, Flush Door, Aluminum Glazed Doors, Steel Doors, fixtures and fastening. Windows - Classification, Teakwood Glazed Windows, Aluminum, Glazed Windows, Steel Windows, UPVC Windows, fixtures and fastening	07
Unit 2	Planning of Residential Building-I Procedure of Building Permission Understanding of municipal drawings. and working drawing Planning of Residential Building: Bungalows, Row Bungalows, and Twin Bungalows	06
Unit 3	Planning of Residential Building-II Hostels, apartments, Farmhouses, cottages	06

Head of Department

Dean Academics

Director

Executive Director

Unit 4	Plumbing, Electrification & Fire resistance in building: Plumbing: Plumbing system, Materials used for plumbing work. Various types of traps, Fittings, Chambers, Septic Tank, and Concept of Plumbing & Drainage plan. Electrification: Types of wiring and materials, Requirements & Location of various points. Concept of Earthing. Fire resistance in building: Fire resistant construction and fire safety requirements for buildings	06
Unit 5	Building Finishes, Acoustics, Ventilation, Air conditioning and Thermal insulation Paints: Different types and application methods. Plastering, Pointing and various techniques. Wall cladding, skirting, dado work with various materials. POP, Gypsum plaster, need of curtains, Tile flooring, door fixtures, plywood boards, aluminum windows & partitions, fabrication work (M.S. & S. S.), Railing- Glass, S.S., M.S. Acoustics: Conditions for good acoustics Ventilation Definition and necessity of Ventilation, various systems. Air conditioning: - Necessity, Classification, Systems & Its various Components Thermal insulation: Materials and Methods.	10
Unit 6	Roofs and Roof coverings Terms used, types of roofs, pitched roofs and their types, Steel Trusses types and their suitability. Roof covering materials and their selection Concept of proflex (truss less) roof and their selection.	04

Course Details:

Class		S.Y. B. Tech, Sem.- III	
Course Code and Course Title		2CVPC204, Surveying	
Prerequisite/s		2CVPC107	
Teaching Scheme: Lecture/Tutorial /Practical		03/00/02	
Credits		04	
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE / ESE	50/50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC204_1	Calculate the independent coordinates for the station of multisided traverse by using the provided field observations with the help of Gales traverse table.
2CVPC204_2	Make use of the field data to calculate the ground levels of a given station point by using the trigonometrical levelling method
2CVPC204_3	Experiment with total stations to measure angles, distances, and elevations for various engineering projects.
2CVPC204_4	Calculate the tachometer constant for a given tacheometer by using field observations.
2CVPC204_5	Utilize the TS/DGPS to monitor construction activities, and verify layout, by given design plans and specifications.
2CVPC204_6	Apply RS/GIS and GPS techniques for geospatial analysis of a region by considering spatial modelling, data analysis and buffering.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Levelling Construction, Temporary and Permanent Adjustments of Dumpy Level, Tilting and Auto Level, Types of Levelling, Effect of curvature and refraction, Sensitivity of Bubble Tube. Contouring, Characteristics of Contours, Methods of Plotting contours, Uses of Contour Maps.	07
Unit 2	Theodolite Travers surveying Types of theodolite, measurement of angles in both planes, Theodolite traversing - Closing error, Relative error of Closure, and Balancing the traverse. Calculation of Latitude and departure, Gales traverse table. Trigonometric levelling.	07
Unit 3	Photogrammetry Introduction to photogrammetry, Types, and applications in the field of civil engineering, Flight planning, Uses and applications of Satellite Photogrammetry.	07
Unit 4	Tacheometry Significance & Systems, Principle, Calculation of tachometer constants, Distance and elevation formula, Stadia method, Substance method and Tangential system. Advanced instrumentation: Classification, measuring principles, Electronic theodolite, EDM, Total Station, DGPS and Drones.	07

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Remote Sensing Physics of Remote Sensing: Sources of Energy, Active and Passive Radiation, Electromagnetic Radiation - Reflectance, Transmission, Absorption, Thermal Emissions, Interaction with Atmosphere, Data Acquisition Platforms, characteristics of different types of platforms - LANDSAT, SPOT, IRS, ERS, INSAT and other platforms.	06
Unit 6	GPS and GIS: Definition and applications, Basics and applications of Geographical Positioning system (GPS), Basics and applications of GIS, Fundamentals of GIS, Software – Standard Packages like Arcview, ArcGIS, AUTOCAD Map, Map Info etc.	05

3. IRC: SP: 42 - Guidelines on Road Drainage
4. IRC: SP: 50 – Guidelines on Urban Drainage
5. IRC: 38 – Design Tables for Horizontal Curves for Highways

Course Contents:

At least 8 experiments along with two surveying projects

Expt. No.	Title of Experiment
1	To calculate reduced levels by various methods of levelling.
2	Measurement of Horizontal angle in the field.
3	To determine reduced levels by trigonometric levelling
4	To determine reduced levels by tachometric surveying
5	To carry out the study of toposheets.
6	Land surveying and mapping by Total Station
7	Land surveying and mapping by DGPS
8	Introduction to Q-GIS Software and its Applications
9	Traverse project (By using Total Station/Differential Global Positioning System)
10	Surveying Projects (Any one) 1. Profile levelling and Road Project (By using Total Station/Differential Global Positioning System) 2. Block Contouring (By using Total Station/Differential Global Positioning System)

Course Details:

Class	S. Y. B. Tech, Sem.-III
Course Code and Course Title	2CVPC205, Hydrology and Irrigation Engineering
Prerequisite/s	2CVBS107, 2CVBS156
Teaching Scheme: Lecture/Tutorial /Practical	03/00/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC205_1	Identify the discharge of catchment area for given time period using the hydrograph methods.
2CVPC205_2	Estimate the flood level of a given site data by using different formulae.
2CVPC205_3	Select the appropriate hydraulic structure for a given site condition with the help of stability condition.
2CVPC205_4	Analyze surface and ground water hydrology parameters for available hydrological data using different formulae.
2CVPC205_5	Select appropriate irrigation methods for given crops patterns by using different parameters like crop-based water requirement and soil conditions.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to hydrology: Hydrological cycle and its components. Brief introduction of government organizations like IMD, CWPRS, MERI, CDO, Hydrology Project Division, NIH, CWC. Precipitation-types and forms, measurement, analysis of Precipitation data, mass rainfall curves, intensity-duration curves, and concept of depth area duration analysis, frequency analysis. Infiltration- factors affecting and measurement methods. Evaporation and Evapotranspiration-factors affecting and measurement methods.	07
Unit 2	Surface Water Hydrology: Runoff- factor affecting, Rainfall runoff relationship. Hydrograph-Component parts of hydrograph, Storm hydrograph, Base flow and Separation of base flow, direct runoff hydrograph, Unit hydrograph, theory, assumptions, limitations and use, S-curve hydrograph, Synthetic unit hydrograph.	08
Unit 3	Stream Gauging: Selection of site, discharge measurement by Area velocity method, slope Area method Floods: Estimation of peak flow - empirical equations, rational method,	06

Head of Department

Dean Academics

Director

Executive Director

	Importance of- Design flood, standard project flood, maximum probable flood, Introduction to flood frequency analysis. QGIS- Introduction to software application in Hydrology (Watershed Delineation)	
Unit 4	Ground water hydrology: Occurrence of ground water Zones of underground water, movement of ground water and its velocity. Specific Yield of Aquifer, Water logging and land drainage, Reclamation of waterlogged Areas, Alkaline and Saline lands reclamation.	07
Unit 5	Minor and Micro Irrigation: Definition and necessity of irrigation, types and methods of irrigation, Crop water requirement: Principal crops and crop seasons, Classes and availability of soil water, Duty, delta, base period and their relationship, factors affecting duty, methods of improving duty, Assessment, and efficiency of irrigation water. Gross command area, cultural command area and command area calculations based on crop water requirement. Depth and frequency of irrigation.	06
Unit 6	Dams And Minor Irrigation: Dam and its classification: Earthen dams and Gravity dams (masonry and concrete) Earthen Dams-Components with function, typical cross section, seepage through embankment and foundation and its control. Methods of construction of earthen dam, types of failure of earthen dam and preventive measures. Gravity Dams-Forces acting on dam, Theoretical and practical profile, typical cross section, drainage gallery, joints in gravity dam, concept of high dam and low dam. Minor Irrigation works - General layout, and main components of Percolation tank, KT Weir and Lift Irrigation	08

Course Details:

Class	S. Y. B. Tech, Sem.-III
Course Code and Course Title	2CVHS206, Environmental Studies
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS206_1	Develop the concept of Sustainability, in context of environmental components, using pillars of sustainable development.
2CVHS206_2	Model his role in effective implementation of sustainable activities, in the corporate sector, using EIA and EMS.
2CVHS206_3	Select the greener technologies as a tool to achieve Sustainable development by knowing the impact of contemporary issues like population explosion, climate change.
2CVHS206_4	Model the role of an individual in prevention of pollution using various types of pollutions using root cause of various types of pollutions.
2CVHS206_5	Prepare a technical report highlighting importance of environment in human life by using techniques like survey, case studies, mini project.
2CVHS206_6	Develop the concept of Sustainability, in context of environmental components, using pillars of sustainable development.

Course Contents:

The main objective of the course is to infuse an understanding of the various environmental concepts on scientific basis in the functional area of Engineering and technology. The course will provide a foundation to critically assess the approaches to pollution control, environmental and resource management, sustainable development, cleaner technologies, Environmental Legislation based on an understanding of the fundamental, environmental dimensions. The course will help to explore the modern concept of green industry and the impact of excess human population, globalization, and climate change on the environment.

Unit No.	Title	Hrs.
Unit 1	Introduction to Environment and concept of Sustainable development: Natural and Built Environment, Environmental Education: Definition, Scope, Objectives and importance. Components of the Environment: Atmosphere, Hydrosphere, Lithosphere and Biosphere. Biological Diversity: Introduction, Values of biodiversity, Threats to biodiversity, Conservation of biodiversity. Sustainable development goals, pillars of sustainable development.	5
Unit 2	Energy and Natural Resources Energy Scenario: Future projections of Energy Demand, Utilization of various Energy Sources, Conventional Energy Sources and Non- Conventional Energy	4

Class	S.Y. B. Tech, Sem.-III
Course Code and Course Title	2CVHS207, Universal Human Values
Prerequisite/s	-----
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS207_1	Integrate the process of self-exploration to achieve Harmony in the human being's based on Holistic perspective of value education.
2CVHS207_2	Understanding Harmony in human being, family, society and nature /existence, based on methods to fulfill human aspiration.
2CVHS207_3	Apply the human values for maintaining the relationships with oneself and others using the principals of harmony.
2CVHS207_4	Adopt the methods of maintaining harmony with the society, nature, and its existence by utilizing the human order systems.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Value Education Introduction, Need, Purpose and motivation for the course, recapitulation from Universal Human Values-I Self-Exploration-what is it? - Its content and process; 'Natural Acceptance' and Experiential Validation- as the process for self-exploration. Continuous Happiness and Prosperity- A look at basic Human Aspirations, Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority.	4
Unit 2	Understanding Happiness and Prosperity Understanding Happiness and Prosperity correctly, Prevailing sources of happiness, Prosperity and its implications. Method to fulfil the human aspirations: understanding and living in harmony at various levels.	4
Unit 3	Understanding Harmony in the Human Being - Harmony in Myself Understanding human being as a co-existence of the sentient 'I' and the material 'Body', Understanding the needs of Self ('I') and 'Body' - happiness and physical facility Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer). Understanding the characteristics and activities of 'I' and harmony in 'I' Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure	6

Head of Department

Dean Academics

Director

Executive Director

	Sanyam and Health.	
Unit 4	Understanding Harmony in the Family - Harmony in Human-Human Relationship Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship Understanding the meaning of Trust; Difference between intention and competence Understanding the meaning of Respect, Difference between respect and differentiation; Peer Pressure the Concerns and its Resolution the other salient values in relationship.	7
Unit 5	Understanding Harmony in the Society Understanding the harmony in society: Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals Human order systems and dimensions	4
Unit 6	Understanding Harmony in the Nature and Existence Understanding the harmony in the Nature, Inter-connectedness and mutual fulfilment among the four orders of nature, recyclability and self-regulation in nature	3

S. Y. B. Tech. Structure

SEM IV

Course Details:

Class	S. Y. B. Tech, Sem.-IV		
Course Code and Course Title	2CVPC209, Fluid Mechanics		
Prerequisite/s	2CVPC103		
Teaching Scheme: Lecture/Tutorial/Practical	03/00/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE / ESE	50/50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC209_1	Solve the basic fluid problems for the given fluid conditions based on the properties of fluids.
2CVPC209_2	Apply the knowledge developed in fluid statics, fluid kinematics and fluid dynamics in fluid flow problems using their basic principles.
2CVPC209_3	Examine the losses in fluid when it is in motion using the principles of continuity, momentum and energy.
2CVPC209_4	Analyze the uniform & non-uniform flow in open channels based on the basic principles developed in open channel flows.
2CVPC209_5	Make use of notches to design the weirs in open channels using the discharge equations.
2CVPC209_6	Compile a report stating the use of different concepts of fluid mechanics in the industry based on the site visit

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Properties of fluids & Fluid Statics: Physical Properties of Fluids, Types of Fluids.	07
Unit 2	Fluid Statics: Types of Pressure, Pressure Measurement Devices, Total Pressure and Centre of Pressure for Plane and Curved Surfaces. Fluid Kinematics: Types of Flows.	06
Unit 3	Fluid Dynamics: Euler's Equation along a Streamline, Bernoulli's Theorem: Assumptions & Limitations, Applications: Venturimeter, Orificemeter. Losses in Pipes: Major and Minor Losses, Concept of Equivalent Pipe, Pipes in Series & Parallel, Two Reservoir Problems, Concept of Siphon	07
Unit 4	Uniform Flow in Open Channel: Introduction, Types of Open Channels and flows, Velocity Distribution, Measurement of Velocity - Chezy's and Manning's Formula, Uniform Flow Computations, Hydraulically Efficient Section, Specific Energy & Specific Force. Notches & Weirs: Types, Discharge Equations.	08

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Non-Uniform Flow in Open Channel (GVF & RVF): Gradually Varied Flow (GVF): Classification of Channel Slopes & GVF Profiles, Dynamic Equation of GVF, Direct Step Method of Computation of GVF Profiles.	07
Unit 6	Rapidly Varied Flow (RVF): Hydraulic Jump - Phenomenon, Conjugate Depth Relationship, Uses and Types of Hydraulic Jump, Hydraulic Jump as an Energy Dissipater.	04

List of Experiments (Any 10)

Expt. No.	Title of Experiment
01	Calibration of Measuring Tank and Measurement of Discharge
02	Study of Pressure Measuring Devices
03	Calibration of Venturimeter
04	Calibration of Orificemeter
05	Verification of Bernoulli's Theorem
06	Determination of hydraulic coefficients of orifice
07	Calculation of Reynolds's number for Laminar and Turbulent flow
08	Study of factors affecting friction factor for pipe flow (at least for two different materials and two different diameters)
09	Study of hydraulic jump for different discharges
10	Plotting specific energy curve for different discharges
11	Calibration of Notches
12	Heleshaw's apparatus for streamline flow
13	Report on visit to CWPRS or hydropower generation plant

Class			S.Y. B. Tech, Sem.- IV
Course Code and Course Title			2CVPC210, Concrete Technology
Prerequisite/s			2CVPC107
Teaching Scheme: Lecture/Tutorial/Practical			03/00/02
Credits			04
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC210_1	Analyze the use of admixture to achieve the appropriate grade under the various exposure conditions
2CVPC210_2	Determine the different properties for a given grade of cement and aggregates with the help of code provisions.
2CVPC210_3	Examine the properties of fresh concrete for the given grade with the help of code provisions.
2CVPC210_4	Design the concrete mix for the given grade of concrete using available ingredients and IS/ACI code.
2CVPC210_5	Determine the quality and strength of concrete for old buildings by utilizing NDT methods.
2CVPC210_6	Select the type of special concrete for different site conditions based on their properties.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Cement: Portland cement, chemical composition, Hydration, Setting of cement, Structure of hydrate cement, Test on physical properties, Different grades of cement. Admixtures: Types of admixtures, mineral and chemical admixtures.	7
Unit 2	Aggregates: Classification of aggregate, Particle shape & texture, strength & other mechanical properties of aggregate, Specific gravity, Bulk density, porosity, adsorption & moisture content of aggregate, Bulking of sand, Deleterious substance in aggregate, Soundness of aggregate, Alkali aggregate reaction, Thermal properties, Sieve analysis, Fineness modulus, Grading curves, Grading of fine & coarse Aggregates, Gap graded aggregate, Maximum aggregate size.	6
Unit 3	Fresh Concrete: Workability, Factors affecting workability, Measurement of workability by different tests, Setting times of concrete, Effect of time and temperature on workability, Segregation & bleeding, Mixing and vibration of concrete, Steps in the manufacture of concrete, Quality of mixing water.	6
Unit 4	Concrete Mix Design Objectives of mix design, Different methods of Mix design, Factors affecting mix proportions, Quality control of concrete, Statistical methods, Acceptance	8

Head of Department

Dean Academics

Director

Executive Director

	criteria. Mix design by IS 10262- 2019, IS 456, Mix design of fly ash concrete by IS 10262, 2019 and Manufactured sand concrete, Mix design by ACI 211.1-91 for high strength concrete.	
Unit 5	Durability of concrete Strength and Durability relationship, the effect of w/c on durability, different exposure conditions as per IS 456 minimum and maximum cement content, Effect of Permeability, Sulphate attack, Methods of controlling sulfate attack. The durability of concrete in seawater. Test on hardened concrete - Flexural strength, Comparison of cube test and cylinder test, Schmidt's rebound hammer, Ultrasonic pulse velocity method.	6
Unit 6	Special concrete Lightweight concrete, No-fines concrete, High density concrete, Self-compacting concrete, Cold weather concreting, Hot weather concreting, Fiber reinforced concrete, ferro-cement concrete, High strength concrete High performance concrete, Manufacturing of ready mix concrete	6

Course Contents for practical	
Expt. No.	Title of Experiment
01	Determination of fineness of cement by Sieve analysis
02	Determination of the standard consistency of cement.
03	Determination of soundness of cement by Le-Chatelier's apparatus/Auto Clave.
04	Determination of initial and final setting time of cement.
05	Determination of compressive strength of cement.
06	Determination of particle size distribution of fine, coarse, and all in aggregate by a sieve analysis (grading of aggregate and FM).
07	Determination of specific gravity, water absorption of fine and coarse aggregates.
08	Nondestructive test on concrete.
09	Mix Design of Concrete using IS10262- 2009, IS 456 and making cubes of concrete. Tests for compressive strength of various grades of concrete cubes (IS 10262- 2009 and IS 456).
10	Determination of workability of fresh concrete by using a slump cone.
11	Determination of compaction factor for the workability of fresh concrete.

Course Details:

Class	S.Y. B. Tech, Sem.-IV
Course Code and Course Title	2CVPC211, Structural Analysis
Prerequisite/s	2CVPC202
Teaching Scheme: Lecture/Tutorial/Practical	03/00/00
Credits	03
Evaluation Scheme: ISE /MSE /ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC211_1	Determine static and kinematic degree of determinacy using equilibrium equation.
2CVPC211_2	Compute principle stress, strain for different loading conditions with the help analytical and graphical method
2CVPC211_3	Draw Influence line diagram for determinate structure by using Muller-Breslau's principle.
2CVPC211_4	Calculate slope and deflections of determinate beams with the help of different methods.
2CVPC211_5	Compute strain energy stored in material under different loading by using concepts of strain energy.
2CVPC211_6	Compute stresses for different structures under different loading using combined stresses theory.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Structural Systems and Energy Concept Forms of structures, Conditions of equilibrium, Degree of freedom, Linear and Nonlinear structures. One, two, three dimensional structural systems, Determinate and indeterminate structures [Static and Kinematics]. Theorem of minimum potential energy, Law of conservation of energy, Principle of virtual work.	07
Unit 2	Principal stresses and strains Concept of principal planes and principal stresses, normal and shear stresses on an oblique plane, magnitude and orientation of principal stresses and maximum shear stress. Mohr's circle for plane stresses.	06
Unit 3	Influence line diagrams Muller-Breslau's principle, influence line diagram for simple and compound beams. Application of influence line diagram to determinate 2D trusses under moving load.	07
Unit 4	Strain energy Concept, expression of strain energy for axially loaded member under gradual, sudden and impact loads. Strain energy due to self-weight.	06

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Slope and deflection of determinate beams Double integration method and Macaulay's method. Moment area method, Conjugate beam method.	06
Unit 6	Combined direct and bending stresses Combined direct and bending stresses, eccentric load on short columns, kern of a section, eccentricity of load about both axes of section. Chimney subjected to wind pressure, problems on dams and retaining walls.	07

Course Code and Course Title	2CVPC212, Construction Management and Economics
Prerequisite/s	-
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE /ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC212_1	Apply the principles of management for decision making by using the management theories.
2CVPC212_2	Make use of ABC and EOQ technique for optimizing inventory of construction material.
2CVPC212_3	Choose the best feasible solution for a given condition using economic comparison techniques.
2CVPC212_4	Select the better investment/business option for a given project by using various economic comparison methods.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Elements of Management Definitions of management, Principle of management (Henry Fayol), Functions of management, Decision Making: Process, Decision Tree, Management theories Neoclassical theory and Maslow's theory.	06
Unit 2	Inventory Management Objectives, Need for Inventory Control, EOQ Analysis, ABC analysis, Safety Stock, Purchase Procedure, Stores Record. (Introduction to material management software.)	07
Unit 3	Economics: Importance, Time Value of Money, Equivalence Present Worth Method, Equivalent Uniform Annual Cost method (EUAC), Future worth method.	07
Unit 4	Economic Comparison Methods: Linear Break Even Analysis, Net Present Value, Rate of Return, Payback Period Method, Benefit- Cost Ratio	06

Course Code and Course Title	2CVSA213, Satellite Geodesy
Prerequisite/s	2CVPC204
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE /ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVSA213_1	Identify the geometry and its relationship with the Earth using different coordinate systems to locate points on Earth.
2CVSA213_2	Choose different coordinate systems used for satellites geodesy under various laws of motion.
2CVSA213_3	Apply satellite geodetic methods to determine the shape, and size of Earth's surface by various coordinate systems.
2CVSA213_4	Make use of the various coordinate system to locate a point on Earth's surface by geodetic applications.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Geodesy Definition, historical background, and importance of geodesy. Geodetic reference systems and datum. Geodetic coordinate systems and transformations. Geodetic Datum and Reference Frames Earth's shape and size. Geoid and its significance. Datum and their evolution. Transformation between datum.	06
Unit 2	Geodetic Measurements and Instruments Basic geodetic measurements (angles, distances, and heights). Introduction to surveying instruments (total stations, theodolites, GNSS receivers, levelling equipment, etc.). Error sources and propagation in geodetic measurements.	07
Unit 3	Satellite Geodesy Global Navigation Satellite Systems (GNSS) - GPS, GLONASS, Galileo, BeiDou, IRNSS etc. Satellite orbit determination. Satellite altimetry and gravimetry. Satellite-based Earth Observation and InSAR (Interferometric Synthetic Aperture Radar).	06
Unit 4	Geodetic Datum and National Coordinate Systems Local, regional, and global geodetic datum. National coordinate systems and map projections.	07

Course Details:

Class	S. Y. B. Tech, Sem.-IV
Course Code and Course Title	2CVEN214, Air Pollution and Control
Prerequisite/s	2CVHS206
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE /ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVEN214_1	Identify the various types of air pollutants, both indoor and outdoor, on the virtue of their potential effects on human health, animals, plants, and materials.
2CVEN214_2	Demonstrate knowledge of meteorological variables in the dispersion of air pollutants based upon lapse rate, inversions, stability conditions, and wind rose diagrams.
2CVEN214_3	Select the different methods of controlling air pollutants at the source, based upon the type of pollutant by making use of process changes and equipment modification.
2CVEN214_4	Apply various direct and indirect methods to control vehicular pollution on the basis of its detrimental effect caused.
2CVEN214_5	Inspect air quality index values for major cities, based upon the standards and legislation governing air quality, using the concept of ambient air quality monitoring.
2CVEN214_6	Identify the applications of software used in the field of air pollution, as a tool of pollution monitoring, using their capabilities to analyze and manage air quality data.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Air Pollution Scope, significance, Air pollutant classification. Indoor air pollution and noise pollution. Effects on Human Health, Animals, Plants and Materials. Major environmental air pollution episodes.	5
Unit 2	Meteorology Meteorological variables, Lapse Rate, Inversions, Stability conditions, Wind rose diagram, General characteristics of Stack plumes, introduction to meteorological models.	4
Unit 3	At source Control of air pollutants Control at source, Process changes, Equipment Modification, Study of air pollution control equipment's-Settling Chambers, Centrifugal separators, Filters dry and wet scrubber and Electrostatic precipitators.	5
Unit 4	Air Pollution Due to Automobiles Air pollution due to petrol-driven and diesel driven engines, Effects, Direct and Indirect methods of control. Traffic and Environment: Detrimental effect of traffic on the environment- Air	4

Head of Department

Dean Academics

Director

Executive Director

	pollution, Pollutants due to traffic. Measures to reduce air pollution due to traffic.	
Unit 5	Ambient Air Quality Monitoring, Standards and Legislation Air quality networks in Maharashtra. National Air Quality index, State Air Quality Index. Study of AQI of major cities. Air Quality and Emission Standards Legislation and Highlights of Air (prevention and control of pollution) Act, 1981.	4
Unit 6	Applications of Software Introduction of various software used in monitoring air pollution and their capabilities.	4

Course Details:

Class	S.Y. B. Tech, Sem.-IV
Course Code and Course Title	2CVHS215, Psychology
Prerequisite/s	-
Teaching Scheme: Lecture/Tutorial/Practical	02/00/00
Credits	02
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVHS215_1	Identify types of emotions, domains of emotional intelligence and their effects on individual and group behavior for fostering empathy and positive relationships.
2CVHS215_2	Explain human behavior, cognition, and emotions by psychological theories in real-life scenarios and contexts.
2CVHS215_3	Discuss effective time management strategies to overcome time-related challenges.
2CVHS215_4	Interpret psychological factors that contribute procrastination to recognize the situational triggers.
2CVHS215_5	Apply the A-B-C model to manage stress for well-being.
2CVHS215_6	Identify types of emotions, domains of emotional intelligence and their effects on individual and group behavior for fostering empathy and positive relationships.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Psychology Definition of Psychology, Different fields of Psychology, Introduction and Need of psychology	2
Unit 2	Emotional Intelligence (EI) (Part one) Role of Emotions, Types of Emotions, Emotions/ stress and performance	4
Unit 3	Emotional Intelligence (EI) (Part Two) Definition of Emotional Intelligence, Key signs of emotional Intelligence, How EI helps students, Marshmallow Experiment, Five domains of Emotional Intelligence	6
Unit 4	Time Management Definition of Time Management, Need and importance of Time management for an individual, Effective steps/ strategies of Time Management, Obstacles of Time Management	4
Unit 5	Procrastination Definition of Procrastination, Types of Procrastination excuses, How to work on excuses, Why Do People Procrastinate?, Procrastination Cycle, Challenging Your assumptions, techniques to beat Procrastination	5
Unit 6	Stress Management Definition of Stress, A-B-C model for Stress, Identifying Stressful Thoughts and identifying cognitive distortions, Restructuring, Behavioural Coping Strategies	5

Class	S.Y. B. Tech, Sem.-IV
Course Code and Course Title	2CVHS216, Constitution of India
Prerequisite/s	-
Teaching Scheme: Lecture/Tutorial/Practical	01/00/00
Credits	01
Evaluation Scheme: ISE	25

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVHS216_1	Explain the meaning, important acts and history related to Indian constitution.
2CVHS216_2	Illustrate the features of Indian constitution and interpretation of Preamble.
2CVHS216_3	Interpret fundamental rights and duties of the Indian Citizen to inculcate morality and their social responsibilities.
2CVHS216_4	Identify different laws and regulations based upon Information Acts.
2CVHS216_5	Distinguish the functioning of Indian parliamentary system and legislative system at the centre and state level.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Constitution: Basic Structure Meaning of the constitution law and constitutionalism, Historical perspective of the constitution of India, Government of India Act of 1935 and Indian Independence Act of 1947.	02
Unit 2	Making of Indian Constitution Enforcement of the Constitution, Meaning and importance of Constitution, Making of Indian Constitution – Sources, Salient features of Indian Constitution, Preamble.	02
Unit 3	Fundamental Rights Fundamental Rights – Features and characteristics, Right to Equality, Right to Freedom, Right against Exploitation, Right to Freedom of Religion, Cultural and Educational Rights, Right to Constitutional Remedies.	03
Unit 4	Fundamental Duties Directive Principles-Definition and Meaning, 42 nd Constitutional Amendment Act, List and Importance of Fundamental Duties.	02
Unit 5	Regulation to Information Introduction, Right to Information Act:2005, Information Technology Act 2000, Electronic Governance in India, Secure Electronic Records and Digital Signatures, Digital Signature Certificates, Cyber Regulations Appellate Tribunal, Limitations of an Information Technology Act	03
Unit 6	Government of The Union and States President of India – Election and Powers, Prime Minister of India - Election and Powers, Lok Sabha - Structure, Rajyasabha – Structure, Governor of State, Chief Minister and Council of Ministers in a state.	02

Course Details:

Class	S. Y. B. Tech, Sem.-IV
Course Code and Course Title	2CVPC217, Building Planning & Drawing Laboratory
Prerequisite/s	2CVPC156, 2CVPC253
Teaching Scheme: Lecture/Tutorial/Practical	00/00/02
Credits	01
Evaluation Scheme: ISE / ESE	50 / 50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVPC217_1	Draw the plan, elevation and section of existing and proposed public building as per National Building code of India
2CVPC217_2	Develop the working drawing of public building considering foundation, furniture, electrification, water supply and drainage as per IS- 962 : 1967
2CVPC217_3	Prepare the site visit report of public building with respect to merits and demerits with the help of submission and working drawing
2CVPC217_4	Create the municipal drawing of a public building by using AutoCAD with the reference of submission drawing

List of Experiments

Expt. No.	Title of Experiment
	Note: Prepare all drawings using AutoCAD software
01	Introduction to prerequisites of planning of public building with reference to national building code (type of public buildings & their specifications)
02	Write site visit report of existing public building (Building units, principles of planning, Building bye laws, dimensions of units etc.)
03	List & Design the units in proposed public building (Area of Building 300-1000 m ²)
04	Draw the plan of proposed public building
05	Draw Municipal Drawing of proposed public building
06	Draw Working drawing of proposed building- Centre line drawing
07	Draw Working drawing of proposed building- Furniture layout
08	Draw Working drawing of proposed building- Electrification layout
09	Draw Working drawing of proposed building- Details of water supply and drainage system

Course Code and Course Title	2CVEL219, Product Development Laboratory
Prerequisite/s	-
Teaching Scheme: Lecture/Tutorial/Practical	00/00/02
Credits	01
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of the course, the student should be able to

2CVEL219_1	Identify the study area for developing a product based on the need of Innovation.
2CVEL219_2	Survey the market needs for the selected prototype using market survey techniques
2CVEL219_3	Test for various characteristics for the generated prototype using appropriate equipment/tests.
2CVEL219_4	Develop the prototype for the identified area based on the market needs and test results.

List of Experiments

This course is designed to provide students with the necessary skills and knowledge to develop innovative solutions to real-world problems. The course will cover the entire process of innovation, from idea generation to prototype development and testing. Students will learn how to identify market needs, develop new ideas, and create prototypes that meet user needs.

Students in a group of 3 to 5 have to identify the real life problem and need to find a viable solution for the same and have to present it for the evaluation. Every group will be provided with one faculty member as mentor.

Expt. No.	Title of Experiment
01	To study the need of Innovation & Prototype Development in material and technology selection
02	Identify the Prototype Development area.
03	Understanding market needs Idea screening and concept development.
04	Selection of Product development (Software base / Manufactured goods) Idea.
05	Material and technology selection for Product development.
06	Preparing the framework for Innovation and Prototype Development idea.
07	Design and fabrication of a prototype Innovation Product.
08	Testing and evaluation of the prototype Innovation Product.

CIVIL ENGINEERING

SEM V- VI

Course Details:

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVVS301, Design of Steel Structures
Prerequisites	2CVPC202, 1CVPC211
Teaching Scheme: Lecture/Tutorial	03/ 00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVVS301_1	Discuss fundamentals of design of steel member and failure modes of steel structures by different methods.
2CVVS301_2	Calculate the various parameters of axially and eccentrically loaded welded and bolted connections by using Limit state method.
2CVVS301_3	Design components of steel truss members as tension and compression members analytically by using Limit state method.
2CVVS301_4	Examine steel column, built up column and column bases for different loading conditions as per IS code provision.
2CVVS301_5	Analyze and Design laterally supported & unsupported beams, gantry girder conditions as per IS code provision.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Design philosophy Introduction to Design of steel structures, Design Philosophy, comparison of LSM & WSM, advantages and disadvantages of steel structures, types of steel structures, grades of structural steel, various rolled steel sections, loads and load combinations partial safety factors for load and materials, load calculation for roof trusses. Connection Types of bolts & welds, analysis, and Design of axially and eccentrically loaded bolted and welded connections (subjected to bending and torsion).	06
Unit 2	Tension Members: Common sections, Net area, modes of failure, load carrying capacity, Design of axially loaded tension members, Design of end connections (Bolted and welded).	06
Unit 3	Compression Members as Struts Common sections, economical sections, effective length, slenderness ratio, modes of failure, classification of cross section, behavior of compression member, load carrying capacity, Design of compression members. Design of column subjected to axial and eccentric loading, Lacing and battening of column.	07
Unit 4	Column Bases Design of slab bases & gusseted base subjected to axial and eccentric load and design of concrete pedestal.	07
Unit 5	Beams Types of sections, behavior of beam in flexure, plastic analysis of beam, design	06

Head of Department

Dean Academics

Director

Executive Director

	of laterally supported, unsupported beams and built-up beam using flange plates, curtailment of flange plates, check for deflection, shear, web buckling & web crippling.	
Unit 6	Gantry girder Forces acting on gantry girder, commonly used sections, design of gantry girder as laterally unsupported beam, connection details. Introduction to plate girder and design concept, Introduction to castellated beam, special types of girders, Introduction to Pre-engineered Buildings structures.	07

Text Books:

Sr. No	Title	Author	Publisher	Edition	Year of Edition

Course Details:

Class	T. Y. B. Tech. Sem.-V		
Course Code and Course Title	2CVPC302, Geotechnical Engineering		
Prerequisites	2CVES203		
Teaching Scheme: Lecture/Tutorial/Practical	03/00/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC302_1	Illustrate the various phase diagrams and derive phase relationship of the soil by using index and engineering properties of soil.
2CVPC302_2	Compute the vertical stresses in soil mass due to various loading conditions by Boussinesq and Westergaard's theory.
2CVPC302_3	Differentiate the concept of permeability & seepage of various drainage condition in soil mass using laboratory methods.
2CVPC302_4	Compare the process of compaction and consolidation in soil for various drainage condition by using field and laboratory methods.
2CVPC302_5	Determine the shear strength & bearing capacity of soil under different drainage/loading condition by various methods.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Properties of Soil: Introduction to Soil Mechanics, formation of soil & soil structure, three phase soil system, weight volume relationships, detail index properties of soil-methods of determination and its significance, particle size analysis, I.S classification of soil, Atterbergs consistency limits, field identification of soils.	06
Unit 2	Permeability and Seepage: Permeability- Darcy's law, Factors affecting permeability, Determination of permeability by constant head and falling head method as per IS-2720, Permeability of layered soils. Seepage- Seepage forces, Flow net construction and practical applications, Concept of effective neutral & total stress in soil mass. Quick sand condition. Piping phenomenon.	06
Unit 3	Compaction and Consolidation: Compaction:- phenomenon. Factors affecting compaction, Dry density and moisture content relationship (MDD & OMC). Zero air voids line. Effect of compaction on soil structure, Standard Proctor test and Modified Proctor test as per IS - 2720. Field compaction equipment and methods, Field control of compaction. Concept of soil stabilization Consolidation:- Spring analogy, Terzaghi's theory of one dimensional consolidation, Lab consolidation test; cc, cv, mv and av Determination of coefficient of consolidation-square root of time fitting method and logarithm of time fitting method. normally consolidated and over consolidated soils,	07
Unit 4	Stress Distribution in Soil: Boussinesq theory-point load, uniformly loaded circular area, pressure distribution diagram on a horizontal and vertical plane, pressure bulb,	07

Head of Department

Dean Academics

Director

Executive Director

	Westergaard's theory (Concept), equivalent point load method, Newmark Influence chart.	
Unit 5	Shear Strength: Concept of shear strength, Coulomb's theory and failure envelope, Principal stress, stress analysis, representation of stresses on Mohr's circle for different types of soil etc. Application of shear stress parameters in the field Unconsolidated undrained, consolidated untrained and consolidated drained (CU, UU, CD), type shear strength test. Concept of Earth Pressure for different pressure conditions	06
Unit 6	Bearing Capacity Evaluation: Definitions, Types of foundation, Shallow foundation and Deep foundation, Modes of failure, Terzaghi's bearing capacity theory with assumptions and limitations, I.S. Code method of bearing capacity evaluation, Effect of various factors on bearing capacity Concept for site Exploration, general & detailed, method for site exploration	07

05	Foundation Design and Construction	MJ Tomlinson	ELBS	9th	2017
06	Design Aids in Soil Mechanics and Foundation Engineering	S.R. Kaniraj	TMH New Delhi	8th	2017

Course Contents:

At least 8 experiments:

Expt. No.	Title of Experiment
1	Determination of water content by oven drying.
2	Determination of Specific gravity by pycnometer/density bottle.
3	Determination of Particle size distribution-Dry Mechanical sieve analysis
4	Determination of consistency limits (LL & PL) and its use in soil classification.
5	Determination of Field density test by Core Cutter Method and Sand Replacement Method
6	Determination of coefficient of permeability by constant head method & variable head method/ falling head method.
7	Determination of compaction by Standard proctor compaction test
8	Calculation of $C-\phi$ value of various soil samples by direct shear test
9	Determination of index properties of soil by digital soil testing equipment's.
10	1. Demonstration of Triaxial shear test 2. Demonstration of Unconfined Compression Test 3. Demonstration of One-dimensional consolidation test

Course Details:

Class	T. Y. B. Tech. Sem.-V		
Course Code and Course Title	2CVPC303, Transportation Engineering		
Prerequisites	2CVPC204		
Teaching Scheme: Lecture/Tutorial/Laboratory	03/00/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC303_1	Utilize the aspects of highway planning for design of the highways using geometric elements.
2CVPC303_2	Select the appropriate method for highway construction and drainage based on the tests of subgrade, aggregates and bitumen.
2CVPC303_3	Apply the various techniques for traffic management of highways using statistical analysis of traffic data
2CVPC303_4	Determine the discharge for designing of bridge and tunnel based on the standard specifications of bridges and tunnel.
2CVPC303_5	Make use of the component parts for the design of railway tracks using the geometric elements
2CVPC303_6	Design the runway length for an airport based on the various parameters and requirements

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Highway Developments and its construction: Various modes of transportation, characteristics and suitability, Development plans, various organizations involved in highway development. Materials – Stone aggregates, soil, cement, bitumen properties and their testing. Construction methods for various types of flexible and rigid pavements. Drainage, repairs and maintenance.	05
Unit 2	Geometric Design of Highways: Cross-sectional elements, sight distance, reaction time, analysis of safe sight distance, and analysis of overtaking sight distance, intersection sight distance, Horizontal, vertical and transition curves, super elevation, widening, requirements as per IRC, Basic concepts and methods of flexible and rigid pavement design.	08
Unit 3	Traffic Engineering: Traffic studies on flow and speed, peak hour factor, accident study, statistical analysis of traffic data; Microscopic and macroscopic parameters of traffic flow, fundamental relationships; Traffic signs; Signal design by Webster's method; Types of intersections, Introduction to Traffic Safety.	07
Unit 4	Bridge Engineering Classification of bridges, selection of site, factor considered for design of bridge, forces acting on super structure. Design considerations, aesthetics of bridge design Tunnel Engineering Introduction, Classification of tunnels: tunneling in hard rock and soft material, tunnel lining, safety measures, ventilation, lighting and drainage in tunneling.	05

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Railway Engineering: History, Indian Railways – strengths and weaknesses, Permanent Way – components, types, functions, Rails: Coning of wheels and tilting of rails Geometric Design: Alignment, Gradients, Horizontal and transition curves, super elevation design, Points and crossings, track junctions, track resistances, tractive effort, and modern trends in railways.	08
Unit 6	Airport Engineering: Importance of air transportation, airport planning: terminal components, surveys and drawings required; airport layout: imaginary surfaces and zoning requirements; Concept of airport runway length, calculations and corrections; use of wind rose diagram.	06

Course Details:

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVPE304, Composite Materials
Prerequisites	2CVPC202
Teaching Scheme: Lecture/Tutorial	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE304_1	Identify the properties of various composite materials used in civil engineering field by given supplementary materials.
2CVPE304_2	Evaluate the characteristics & performance of composite materials used in civil engineering field by analyzing standard testing data.
2CVPE304_3	Justify integrity of composite materials by using various destructive & non-destructive tests used in civil engineering.
2CVPE304_4	Utilize various composite materials in civil engineering work by understanding their properties.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Composites Concept of Composite, Basic Definitions and Classifications of Composites– Organic Matrix Composites- Based on Reinforcements and Matrices, Basic Constituent materials in Composites, Fibre Reinforced Composites (FRP) and laminated Composites,	07
Unit 2	Characteristics and Performance of Composite Materials Stress and Strain Concept, Plane stress concept, Mechanical properties, Thermal properties, Electrical properties, Chemical properties.	06
Unit 3	Composite Material Evaluation and Fabrication Destructive testing: tensile testing, compressive testing, and impact testing, Non-destructive testing: ultrasonic testing, radiography, acoustic emission testing, Composite bonding techniques.	06
Unit 4	Applications of Composite Materials in Civil Engineering Structural applications: beams, columns, plates, shells, and bridges, Non-structural applications: pipes, tanks, vessels, and other infrastructure components, Case studies highlighting the selection of materials for specific applications	07

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVPE305, Investment Planning and Management
Prerequisites	2CVPC206
Teaching Scheme: Lecture/Tutorial	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE305_1	Practice the Financial Planning Standards and Code of Ethics and Professional Responsibility for investment management
2CVPE305_2	Understand the role of Investment planning in the personal risk analysis process, retirement planning process, etc.
2CVPE305_3	Identify the basic concept of ethical issues involved in the finance industry.
2CVPE305_4	Evaluate the appropriateness of tax strategies for different scenarios.
2CVPE305_5	Determine various goal-based strategies and evaluate investment choices in the context of client's financial planning needs.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Investment Products and their Applications Fixed Income Instruments, Mutual Fund Products, Equity Market, Derivatives and Commodities, Foreign Exchange Market, Real Estate and other Investments	07
Unit 2	Risk Profiling of Products and Investors- Asset Allocation Determination Types of Investment Risks, Product Profiling in terms of inherent Risk and Tenure, Risk Profiling of Investors, Asset Allocation- Financial Assets, Types of Asset Allocation Strategies	06
Unit 3	Goal-based Investment Planning, Measuring and Managing Risks, Analysis of Returns Investment Planning to achieve Financial Goals, Measuring Risk, Diversification Strategies, Analysis of Returns, Retirement Planning and Employee Benefits	07
Unit 4	Investment Strategies and Portfolio Management Active Investment Strategies, Passive Investment Strategies, Investment Portfolio Management, Revision of Portfolio, Tax Planning and Estate Planning	06

Course Details:

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVPE306, Public Health Engineering
Prerequisites	2CVHS206, Environmental Studies
Teaching Scheme: Lecture/Practical/ Tutorial	02/00/00
Credits	02
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE306_1	Apply principles of water supply engineering to implement sustainable water supply, ensuring better public health.
2CVPE306_2	Utilize principles of waste water engineering to implement effective sanitation infrastructure, ensuring improved public health.
2CVPE306_3	Suggest solid waste management practices in mitigating environmental pollution to protect public health.
2CVPE306_4	Make use of integrated approaches for air pollution control and management, incorporating advanced technologies and strategies to improve air quality and minimize health risks associated with air pollution exposure.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Water Supply Engineering Overview of water sources and distribution systems, Importance of clean water for public health. Characteristics of drinking water quality, Drinking water quality standards and regulations. Introduction to water treatment methods: Aeration, Sedimentation, Filtration, Disinfection etc. Introduction to software applications for water quality modelling and simulation.	07
Unit 2	Wastewater Treatment Sources and types of wastewater. Objectives and principles of wastewater treatment. Parameters affecting wastewater quality: BOD, COD, suspended solids, etc. Introduction to biological, physical, and chemical wastewater treatment methods. Overview of software tools for wastewater treatment plant design and optimization.	06
Unit 3	Solid Waste Management Types and composition of solid waste, Solid waste generation rates and trends, Environmental and health considerations in solid waste disposal.	06

Head of Department

Dean Academics

Director

Executive Director

	Functional elements of solid waste management system Overview of solid waste treatment methods: landfilling, composting, recycling, etc. Plastic and E-waste management methods. Application of software for waste stream characterization and landfill design.	
Unit 4	Air Pollution and Control Sources and types of air pollutants: particulate matter, gases, volatile organic compounds, etc. Health and environmental impacts of air pollution. Principles of air quality monitoring: sampling techniques, monitoring stations. Air quality indices and standards. Overview of air pollution control devices: gravity settlers, electrostatic precipitators, scrubbers, adsorbers, fabric filters etc. Introduction to software tools for air quality modelling and prediction.	07

Class	T. Y. B.Tech. Sem.-V
Course Code and Course Title	2CVPE307, Site Investigation Methods & Practices
Prerequisites	2CVPC302
Teaching Scheme: Lecture/Tutorial	02/00
Credits	02
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE307_1	Select suitable site for construction of civil structures using ground characteristic criteria.
2CVPE307_2	Choose reliable subsurface exploration technique for identification of depth wise sequence of soil and rock layers by utilizing drilling methods.
2CVPE307_3	Prepare detail site investigation report to showcase site characteristics with the help of soil tests, geophysical survey, and core logging results.
2CVPE307_4	Differentiate between result interpretation methods to know physical properties of subsurface materials by choosing appropriate geophysical method.
2CVPE307_5	Identify characteristics of objects on aerial photograph for aerial photo interpretation depending on aerial photo recognition elements.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Site Investigation Introduction, Site selection criteria, the Importance of Site Investigation, Purposes of a Site Investigation, Objectives, Need for Site investigation, Advantages of Site Investigation, Phases in site investigation process	07
Unit 2	Methodology of Site Investigation Preliminary site investigation: Preliminary desk study, Topographical maps, Geological records, Mining records, Air photo interpretation, Drone Surveying, Importance of GPS in site investigation, Site walk-over survey, Reconnaissance of site works.	06
Unit 3	Site Investigation using Non-Destructive Tests Introduction, Electrical Methods, Magnetic Methods, Gravity Methods, Acoustic Emission Methods, Seismic Methods	07
Unit 4	Exploratory Drilling Observations, Preservation of cores and Core logging, Core recovery, R.Q.D, Technical Report Writing-Standard formats for preparation of a site investigation report	06

Course Details:

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVPE308, Remote Sensing
Prerequisites	2CVPC204
Teaching Scheme: Lecture/Tutorial	02/00
Credits	02
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE308_1	Experimenting with the remote sensing data for mapping of earth surface features using supplementary resources.
2CVPE308_2	Preparing the data analysis sheet by preprocessing techniques using available remote sensing software and datasets.
2CVPE308_3	Presenting meaningful information for specific applications by interpreting and validating results using ground truth data.
2CVPE308_4	Apply remote sensing techniques to solve problems in fields such as agriculture, forestry, urban planning, and disaster management under a specific problem scenario and relevant datasets

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Physics of Remote Sensing Sources of Energy, Active and Passive Radiation, Electromagnetic Radiation – Reflectance, Transmission, Absorption, Thermal Emissions, Interaction with Atmosphere, Atmospheric windows, Spectral reflectance of Earth's surface features, and Multi concept of Remote Sensing.	06
Unit 2	Platforms and Sensors Various types of platforms, different types of aircraft, manned and unmanned spacecraft used for data acquisition – characteristics of different types of platforms – airborne and spaceborne, IRS Satellite Sensors, LANDSAT, SPOT, IKONOS, Quickbird, GeoEye, Kompsat, Worldview II & III, Microwave, ALOS, Planet Data, Sentinel, SMAP, MODIS etc	07
Unit 3	Thermal Remote sensing Infrared Scanners, Scatterometer, Thermal Properties of Terrain, Thermal IR Environmental Considerations, Thermal Infrared and Thermal Scanners,	06
Unit 4	Data Acquisition Systems and Applications Optical, Thermal and Microwave; Resolutions – spatial, spectral, radiometric and temporal, Applications of Remote sensing in various Engineering and Science domains such as Agriculture, Forest, Soil, Geology, LU/LC, Water Resources, Urban, Disaster Management, etc	07

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVSA309, Global Navigation Satellite Systems
Prerequisites	2CVSA213
Teaching Scheme: Lecture/Tutorial	03/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVSA309_1	Analyze GNSS data to determine accurate positions and velocities using appropriate techniques like Static, RTK, PPK.
2CVSA309_2	Evaluate the performance of GNSS receivers and identify sources of error in satellite-based positioning using RTK and PPK technique
2CVSA309_3	Apply GNSS positioning methods to solve navigation and tracking problems in engineering applications using various methods.
2CVSA309_4	Design integrated solutions using GNSS and other technologies to solve complex spatial challenges in engineering problems.
2CVSA309_5	Demonstrate the principles and applications of Global Navigation Satellite Systems using GNSS and Remote Sensing.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to GNSS Overview of Global Navigation Satellite Systems, History and Development of GNSS, Basic Principles of Satellite-Based Positioning, Types of GNSS Constellations (GPS, GLONASS, Galileo, BeiDou)	07
Unit 2	GNSS Signals and Receivers GNSS Signal Structure and Characteristics, GNSS Receiver Architecture, Signal Processing Techniques in GNSS Receivers, Error Sources in GNSS Positioning	07
Unit 3	GNSS Positioning Techniques GNSS Positioning Methods (Single Point, Differential, Precise Point Positioning), Real-time Kinematic (RTK) Positioning, GNSS Data Processing and Analysis, GNSS Augmentation Systems	06
Unit 4	GNSS Applications Navigation and Tracking Applications of GNSS, GNSS in Surveying and Mapping, GNSS in Transportation and Vehicle Navigation Systems, GNSS in Timing and Synchronization.	06
Unit 5	Integration of GNSS with Other Technologies Integration of GNSS with Inertial Navigation Systems (INS), GNSS and	06

Course Details:

Class	T. Y. B. Tech. Sem.-V
Course Code and Course Title	2CVEN310, Water & Waste Water Engineering
Prerequisites	2CVHS206, Environmental Studies
Teaching Scheme: Lecture/Practical/ Tutorial	03/00/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEN310_1	Identify sources of water with respect to its quality and quantity for water supply.
2CVEN310_2	Choose different water treatment processes to render the water quality suitable for drinking.
2CVEN310_3	Develop proficiency in the operation and maintenance of water supply systems, including the identification of causes and impacts of water losses.
2CVEN310_4	Apply of fundamental principles underlying waste water engineering to form the sewerage system.
2CVEN310_5	Manipulate various rules and regulations as a tool to control pollution of water.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Fundamentals of Water Treatment Sources of water, Evaluation of surface water and groundwater sources. Factors influencing the selection of water sources: quantity, quality, accessibility, sustainability. Introduction to Water Quality, Overview of water quality parameters and their significance.	06
Unit 2	Water treatment Treatment: Philosophy, Unit processes and operations. Aeration: Process, Types of aerators. Coagulation and Flocculation: Theory, Practices. Settling: Theory, Types. Granular Filtration: Classification, Theory of deep mono and dual bed filter. Components of deep bed filter, Filter operation, sizing of beds. Disinfection: Types, Chemistry of chlorination, Chlorine demand, Chlorination practice, UV and Ozone disinfection. Overview of membrane filtration technologies: reverse osmosis, nanofiltration, ultrafiltration.	07
Unit 3	Water Distribution Systems Overview of gravity-fed and pressurized water distribution systems. Operation and maintenance of Water supply system, Causes and impacts of water losses in distribution systems, Strategies for leakage detection, repair, and	06

Course Details:

Class	T.Y.B. Tech. Sem.-V
Course Code and Course Title	2CVEL311, In-Plant Training
Prerequisite/s	2CPVC103, 2CVPC113
Teaching Scheme: Lecture/Tutorial	00/01
Credits	01
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEL311_1	Apply theoretical knowledge to practical civil engineering tasks in an industrial setting.
2CVEL311_2	Execute engineering drawings and specifications according to industry standards.
2CVEL311_3	Collaborate effectively within multidisciplinary teams to achieve project goals.
2CVEL311_4	Apply safety regulations and protocols in civil engineering operations.
2CVEL311_5	Evaluate the economic and environmental impact of engineering solutions.

The students are required to undergo rigorous field training in Civil Engineering at least for 15 days after end of IVth semester. Field training work will be evaluated in the Vth semester. At the end of the course each student has to submit a report which will be consisting of a certificate from the Officer in-charge of training from the industry highlighting the topics to which the student is exposed to in the field. The student is required to make a presentation of the skills that he has acquired during the in-plant training.

The Site Work shall consist of:

1. Survey and Layout
2. Actual Site measurement
3. Quality control on site
4. Evaluation of Specification for Building materials.

The report shall consist of:

1. Company/Project details.
2. Site layout
3. Building materials details
4. Bar chart of work done
5. Daily material consumption and Work progress report
6. Knowledge & Skills acquire from field training.

Evaluation of field work report will be done by the Departmental Committee.

Class	T.Y B.Tech., Sem - V
Course Code and Course Title	2CVHS312 - Entrepreneurship
Prerequisite/s	---
Teaching Scheme: Lecture/Tutorial	00/00/02
Credits	01
Evaluation Scheme: ISE	50/00

Course Objectives:

1. This course aims to equip engineering students with the knowledge and skills to identify opportunities, develop innovative solutions, and launch successful engineering-based ventures.

Course Outcomes (CO's):

After successful completion of this course, the student will be able to,

Course Outcomes (COs):	
Upon successful completion of this course, the student will be able to:	
2CVHS312_1	Identify and evaluate potential business opportunities in the engineering domain.
2CVHS312_2	Conduct market research and analyze the competitive landscape.
2CVHS312_3	Craft a comprehensive business plan, including financial projections.
2CVHS312_4	Understand the fundamentals of marketing, sales, and operations for engineering ventures.
2CVHS312_5	Pitch their business ideas to potential investors.
2CVHS312_6	Grasp the legal and ethical considerations of starting a business.

Course Contents:

1. The Entrepreneurial Ecosystem
2. Idea Identification and Prototyping
3. Testing, Validation and Commercialization
4. Market Analysis and Competitive Landscape
5. Legal Procedure to setup an Startup Business
6. Understanding Finance Basics
7. Business Planning and Development
8. Marketing and Sustainability
9. Pitching and Fundraising
10. Startup Case Studies

SEM V- VI

Course Details:

Class	T. Y. B. Tech. Sem.- VI
Course Code and Course Title	2CVPC314, Theory of Structures
Prerequisites	2CVPC202, 2CVPC211
Teaching Scheme: Lecture/Tutorial	03/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC314_1	Classify a given structure to interpret degree of indeterminacy by computing static and kinematic.
2CVPC314_2	Analyze statically indeterminate beams by using any force method.
2CVPC314_3	Estimate all support reactions of indeterminate structures by using matrix methods.
2CVPC314_4	Investigate kinematically indeterminate structure by using slope deflection method or moment distribution method.
2CVPC314_5	Analyze indeterminate portal frames using any structural approach method.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Structures: Types of structures, Determinate and Indeterminate Structures, Static and kinematic indeterminate structures Consistent Deformation Method: Applications to propped cantilever and fixed beams, beams with varying M. I. (Max. Degree = 2).	07
Unit 2	Strain Energy Method: Strain energy due to various forces, Castigliano's theorem, Application to statically, Indeterminate structures - Portal frames, Analysis of indeterminate trusses (Max. Degree = 2).	06
Unit 3	Slope Deflection Method: Slope deflection equations, applications to beams, Portal frames with and without sway. Modified slope deflection method. (Max. Degree = 2).	06
Unit 4	Moment Distribution Method: Relative and absolute stiffness, Distribution factors, Sinking of Supports, Applications to beams, Portal frames with and without sway (Max. Degree = 2).	06
Unit 5	Matrix Method: Introduction to flexibility, flexibility coefficients, Development of flexibility matrix, Analysis of beams (Max. Degree = 3). Introduction to stiffness, stiffness coefficients, Development of stiffness matrix, Analysis of beams (Max. Degree = 3).	07

Head of Department

Dean Academics

Director

Executive Director

Unit 6	Structural Approach Methods: Difference between structural and member approach methods, Introduction to Portal frame analysis method and numericals, Introduction to Cantilever analysis method and numericals.	07

Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC315_1	Apply the fundamental principles underlying water treatment to estimate capacities for water supply systems.
2CVPC315_2	Design various components of water treatment plant and distribution system of given design capacity referring the standard parameters.
2CVPC315_3	Apply the fundamental principles underlying wastewater engineering to design the components of sewerage system.
2CVPC315_4	Identify various conventional and low-cost processes to treat the wastewater considering characteristics of wastewater to be treated.
2CVPC315_5	Manipulate various rules and regulations, and strategies as a tool to control the pollution of water.
2CVPC315_6	Professionally comment on the quality of water and suggest the desired treatment by characterizing the sample using various physico-chemical tests.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Fundamentals of Water Treatment Sources of water, Evaluation of surface water and groundwater sources. Factors influencing the selection of water sources: quantity, quality, accessibility, sustainability. Introduction to Water Quality, Overview of water quality parameters and their significance, Methods for population forecasting. Estimation of water demand for various sectors: residential, industrial, etc. Estimation of fire demand.	06
Unit 2	Water treatment processes Treatment: Philosophy, Unit processes and operations. Intake structures and rising main. Aeration: Process, Types of aerators, Design of cascade aerator. Coagulation and Flocculation: Theory, Practices, sizing of units. Settling: Theory, Types, Design circular clarifiers for type 1 settling. Granular Filtration: Classification, Theory of deep mono and dual bed filter. Components of deep bed filter, Filter operation, sizing of beds. Disinfection: Types, Chemistry of chlorination, Chlorine demand,	08

Head of Department

Dean Academics

Director

Executive Director

	Chlorination practice, UV and Ozone disinfection. Overview of membrane filtration technologies: reverse osmosis, nanofiltration, ultrafiltration.	
Unit 3	Water Distribution Systems Overview of gravity-fed and pressurized water distribution systems. Design considerations for pipeline networks, pumps, and storage reservoirs. Operation and maintenance of Water supply system, Causes and impacts of water losses in distribution systems, Strategies for leakage detection, repair, and water loss reduction. Introduction to software for design of water distribution system.	06
Unit 4	Fundamentals of Wastewater Engineering Wastewater: Sources, Flow rate and variations, Quantitative estimation, Characteristics Gravity sewer collection system: Types of Sewerage systems, Design considerations for sewer layout, pipe materials, and hydraulic capacity. Design of sewerage system, sewer appurtenances. Introduction to software for design of sewerage system	06
Unit 5	Wastewater treatment processes Wastewater treatment: Philosophy, Overview of primary, secondary, and tertiary treatment processes Primary treatment: Screening, Grit removal, Settling Biological/Secondary treatment: Fundamentals of aerobic and anaerobic treatment, Conventional Activated Sludge Process (ASP) and modifications, Process design and operating parameters, Operational problems. Low-Cost Wastewater Treatment Technologies: Constructed wetlands, Rotating biological contactors, oxidation ditch and Waste stabilization pond, Septic tank: concept and design.	08
Unit 6	Disposal of wastewater Methods, Effluent standards. Stream pollution: Self-purification (Stream rejuvenation), DO sag curve, Streeter Phelps' equation for point source, Stream classification. Introduction of water quality index.	05

3. Manual on Municipal Solid Waste Management, CPHEEO, Ministry of Housing and Urban Affairs Development, Govt., of India, New Delhi, 2016.

Course Contents:

At least 8 Laboratory experiments on water and waste water characterization along with one design project and two plant visits:

Expt. No.	Title of Experiment
01	Any 8 Experiments from following list Introduction to standards, collection and preservation of samples, sampling techniques. Determination of pH of given water sample. Determination of acidity of given water sample. Determination of alkalinity of given water sample. Determination of conductivity of given water sample. Determination of turbidity of given water sample. Determination of hardness of water sample. Determination of chloride content of water sample. Determination of DO content of given water sample. Determination of different types of solids of given water sample. Determination of optimum alum dose for given water sample. Determination of BOD of given waste water sample. Determination of COD content of given waste water sample.
02	Visit to water and waste water treatment plant.
03	Design of a conventional water/ waste water treatment plant.

Course Details:

Class	T. Y. B. Tech. Sem.-VI
Course Code and Course Title	2CVPC316, Design of RCC Structures
Prerequisite/s	2CVPC202, 2CVPC211, 2CVVS301.
Teaching Scheme: Lecture/Tutorial	03/00
Credits	03
Evaluation Scheme: ISE/MSE/ ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC316_1	Analyse the different parameters used in reinforced concrete by limit state method
2CVPC316_2	Illustrate shear parameters of different structural members by limit state method
2CVPC316_3	Analyse the reinforcement details of the slab and staircase by limit state method
2CVPC316_4	Evaluate various design parameters of beams by limit state method
2CVPC316_5	Estimate sectional properties of column and footing by limit state method

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Limit State Method: Introduction- Stress-strain behaviour of concrete and steel, Behaviour of RCC, Properties of concrete and reinforcing steel, Permissible stresses in steel and concrete, Different design philosophies, various limits states, Characteristic strength and Characteristic load, Load factor, Partial safety factors.	06
Unit 2	Limit State collapse: a) Limit state of collapse (shear and bond): Shear failure, Types of Shear reinforcement, Design of Shear reinforcement, Bond-types, Factors affect in bond Resistance, Anchoring reinforcing Bars in Tension and Compression, Check for development length, Types of cracks.	06
Unit 3	Beam: Limit state of collapse (flexure): Stress in Compression reinforcement, Serviceability considerations in beam design, Analysis and Design of Singly and Doubly Reinforced rectangular sections, Cantilever beam, Design of Continuous beam by IS coefficient method	07
Unit 4	T & L Beam: Analysis of singly reinforced T and L beams, Depth of Neutral Axis within Flange, Depth of Neutral Axis outside Flange, Design of singly reinforced T and L beams.	06
Unit 5	Slab & Staircase: a) Design of slabs: Cantilever Slab, simply supported One way slab, two-way slab with different support conditions as per IS: 456-2000. Deflection control in slabs. Detailing of slab reinforcements. b) Design of Simply Supported single flight and Dog legged staircase.	07
Unit 6	Column & Footing: Types of footings and their design considerations, Analysis and Design of axially loaded circular and rectangular columns, Circular column with helical reinforcement, Interaction diagrams for column design	07

Head of Department

Dean Academics

Director

Executive Director

	Design of isolated rectangular & Square column footing with constant depth subjected to axial load

Course Details:

Class	T. Y. B. Tech. Sem.-VI		
Course Code and Course Title	2CVPE317, Structural Audit		
Prerequisites	2CVPC210		
Teaching Scheme: Lecture/Practical	03/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE317_1	Discuss the basics of structural Audit and its legal aspects for various civil structures by considering government acts.
2CVPE317_2	Identify parameters of visual inspection of different civil structures with the help of structural defects mapping.
2CVPE317_3	Examine the different health parameters of the civil structures using NDT and SDT Techniques.
2CVPE317_4	Prepare an audit report of civil structures by analyzing data collected from different auditing method

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Structural Auditing: Introduction and Necessity of structural Auditing, Structural failure of Building, Structural failure of Bridges, Structural failure of public transport system, Structural failure of industry, Design life structures.	06
Unit 2	Legal aspects and awareness: Introduction to legal aspects and awareness, Insurance scheme, Government act and circulars-Guidelines for public and private participation, Awareness about safety, precautions, Structural Auditor registration	07
Unit 3	Structural Auditing Records: Introduction to defect mapping and accessibility to records, Structural condition: Visual inspection, Reason of distress, Safety and Quality, Availability of drawing, Maintenance records, Inspection records, Accessibility Records.	06
Unit 4	Methods of Testing of structures: Visual inspection of structures, Nondestructive testing: Rebound hammer test, Rebar locator test, semi destructive test: Ultra sonic pulse velocity method, Carbonation test, Half-cell potentiometer test, Computerized testing, Destructive testing, Interpretation of tests	07
Unit 5	Structural Audit Report: Introduction to Audit report, Drawing specifications, Structural Audit Reports for different types of buildings, Tenders for Repairs of structures. Necessity and importance of Budget estimation, Steps in budget	07

2. IS 13805: 2004: General Standard for Qualification and Certification of Non-Destructive Testing Personnel — Specification (First Revision)

Expt. No.	Title of Experiment
01	Assess the quality and strength of concrete by using rebound hammer test.
02	Assess the quality and strength of concrete with the help of ultrasonic plus velocity method.
03	Detection of location and diameter of the reinforcement in the RCC element by using rebar locator.
04	Determination of quality and strength of concrete with the help of concrete core Extraction and compression testing machine.
05	Identifying the corrosion of reinforcement in RCC element using half Cell Potential meter.
06	Visual inspection and structural audit report of building.
07	Visual inspection and structural audit report of steel structures or bridges.
08	Detailed structural audit report of visited structure.

Course Details:

Class	T. Y. B. Tech, Sem. - VI		
Course Code and Course Title	2CVPE318, Safety Aspects in Civil Engineering		
Prerequisite/s	---		
Teaching Scheme: Lecture/ Practical	03/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE318_1	Discuss the importance of safety and different safety Acts for the given construction project as per safety standards and legislation
2CVPE318_2	Prepare the safety plane and safety management system for the given construction site using different norms of safety planning and management.
2CVPE318_3	Identify the different causes and percussion measures for construction sites with the help of accident programs, accident investigation methods and monitoring techniques.
2CVPE318_4	Select the safety measures for the different construction activities for a given construction project with the help of different norms and code provisions.
2CVPE318_5	Apply the proper safety precautions for different construction equipment with the help of their safety criteria.

Course Contents:		Hrs.
Unit 1	Introduction to safety Safety, Importance of safety, safety committee and its function Safety and productivity- Role of Government- National Safety Council, role and responsibility of safety officers, duties of safety officers, safety sign and symbols.	06
Unit 2	Safety Standards and Legislation: ILO model code of safety regulation/legislation, factory Act, Workman's Compensation Act. Employer's insurance Act, Preventive Measures Factory Act. Study of various IS codes used for safety in different operations of construction and OSHA guidelines.	07
Unit 3	Accidents Types, Classification of Accidents, Causes, direct and indirect cost of accidents, objective of accident programs. Precautionary measures, accident investigation, emergency preparedness, Hazard Identification and Control, Hazard Assessment, Inspections and Monitoring Worksites.	06

Head of Department

Dean Academics

Director

Executive Director

Unit 4	Safety Planning Purpose for planning, planning procedure, range of plans, safety policies, Elements of safety policy, implementation, Safety training, various safety equipment's, occupational hazards Safety Management system (SMS), Safety culture, Fire Audit, Safety Audit, Safety Assurance, Safety Promotion.	07
Unit 5	Safety in various construction Activities: Excavation, Scaffolding, False work, Roof work, Safety in Tunnelling, Safety in work over water, Demolition, Explosives, Fire Extinguisher- training and use, Self-Inspection Checklist, Workplace Hazardous Information System (WHMIS)	07
Unit 6	Safety in handling of construction machinery Selection, operation, inspection and testing of hoisting cranes, mobile cranes, tower cranes, tower-cranes crane inspection checklist builders hoist winches chain pulley block use of conveyors- concrete mixer concrete vibrators safety in earth moving equipment's – excavators, dozer, loader dumpers motor grader concrete pumps welding machine use of portable electrical tools drills gridding tools.	06

All Experiments are mandatory	
Exp. No	Experiment details
1	Study of Safety Engineering Acts and Regulations.
2	Study of importance of safety equipment used on site by poster presentation.
3	Case study presentation on the current scenario of construction sites related to accidents and safety.
4	Case study presentation on safety precautions for different construction activities.
5	Presentation on safety precautions for various construction equipment.
6	Analysis of Construction Site Accidents: Causes and Cost Implications.
7	Development of a Safety Management System for Residential Construction Sites.
8	Design of safety management system for any industrial project.

Course Details:

Class	T. Y. B. Tech. Sem. VI		
Course Code and Course Title	2CVPE319, Sustainable Management of Solid Waste		
Prerequisites	2CVHS206, Environmental Studies		
Teaching Scheme: Lecture/Practical/ Tutorial	03/02/00		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE219_1	Apply the fundamentals of solid waste management, as the tool for of sustainable development by analysing its environmental and health impacts.
2CVPE219_2	Choose strategies for waste minimization, source separation, and collection optimization to effectively manage solid waste in diverse settings.
2CVPE219_3	Design integrated solid waste management plans and policies that promote waste reduction, recycling, and resource recovery, while minimizing environmental pollution and public health risks.
2CVPE219_4	Recommend practical solutions for sustainable solid waste management in real-world settings.
2CVPE219_5	Make use of the municipal solid waste rules and government initiatives as a tool for solid waste management.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Solid Waste Management Solid waste Sources, Types, Composition, Environmental and health considerations in solid waste treatment processes, Solid Waste Management objectives, Functional elements, Present scenario of municipal solid waste management in India, Typical values for solid waste generation in Indian cities Overview of solid waste treatment methods: incineration, composting, anaerobic digestion, landfilling.	7
Unit 2	Collection, transfer and transport of solid waste Storage and collection: General considerations for waste storage at source, Methods and equipment for solid waste collection: manual collection, mechanized collection, collection vehicles. Transportation of solid waste: Means and methods, Planning and optimization of waste collection routes. Transfer station: Need, Types, factors affecting Capacity, Location and	6

	economic Viability.	
Unit 3	Solid Waste Treatment approaches Waste Processing Techniques: Purpose, Mechanical volume and size reduction, component separation techniques. Material Recovery and Recycling: Objectives, Recycling program elements, commonly recycled materials and processes. Introduction to the global plastic and e-waste crisis. Introduction to plastic and e-waste management approaches, Extended Producer Responsibility (EPR) programs.	7
Unit 4	Recovery of Conversion Products Energy recovery from solid waste: Parameters affecting, Fundamentals of thermal processing, Pyrolysis, Incineration, Refuse derived fuels, Energy recovery, case studies under Indian conditions. Composting: Benefits, Factors affecting properties of compost, Processes, Stages, Technologies. Vermicomposting, Mechanical composting, In-vessel composting and Bio-methanation.	7
Unit 5	Sanitary Landfilling Dumpsites: Problems associated with dumpsites, Management, Dumpsite rehabilitation, Bio-mining of dumpsites. Sanitary Landfills. Site selection, Types, Principle, Processes, Land filling methods, Design and operation of solid waste treatment facilities, Landfill Liners, Leachate and landfill gas management, closure, post-closure plans.	6
Unit 6	Municipal Solid Waste Rules and Government Initiatives Waste Management legislation in India, MSWM Rules 2016, Role of CPCB and SPCB in management of solid waste. Legislation for biomedical and construction and demolition waste management. Integrated solid waste management approaches: waste-to-energy, circular economy models	6

2. The Solid Waste Management Rules, 2016, Ministry of Environment, Forest and Climate Change, New Delhi, 2016

Course Contents:

The students in a group of 4 to 5 are to perform the case study and prepare the solid waste management plan for small community/colony/village. The task can be divided under following 4 activities

Activity 1: Preliminary Research and Data Collection

Activity 2: Waste Characterization and Analysis

Activity 3: Identification of Waste Management Issues and Challenges

Activity 4: Development of a Waste Management Plan and Implementation Strategy.

Class	T. Y. B. Tech. Sem.-VI		
Course Code and Course Title	2CVPE320, Smart Cities		
Prerequisites	2CVPC303		
Teaching Scheme: Lecture/Tutorial/Laboratory	03/00/02		
Credits	04		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE320_1	Identify the roles of different organizations for the planning of towns based on their development plans.
2CVPE320_2	Make use of regional plan and development plan for a town using various surveys.
2CVPE320_3	Utilize different government acts for planning of a town based on town planning schemes.
2CVPE320_4	Understand the concept of smart cities and understand national and global policies to implement for smart city development.
2CVPE320_5	Apply planning and design techniques to different smart cities in India.
2CVPE320_6	Evaluate smart transport system for smart cities by considering their applications.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Town Development Theories: Objective of town planning, principles, stages in town development, brief history, growth of towns and theories of developments (ribbon, sector zone, concentric, multiple zones etc.), Institutional arrangements in Maharashtra (CIDCO, MMRDA, MHADA, SRA, TPVD etc.)	04
Unit 2	Regional and Development Plan: Need of contents of Regional Plan, Regional Delimitation, Surveys necessary for Regional Plan, Analysis and Projections, Necessary Steps for starting and ending the process of Regional Planning, Relation with the state Plan and surroundings. Surveys, types, duration etc., Analysis and Projections, Demographic Projections, Goals and objectives, Public Participation, Implementation and Financial Aspects, Delineation, Relation with R.P., Content of DP and Planning norms, Modifications, purchase notice, Legal and Administrative process to start D.P.	08
Unit 3	Town Planning Scheme: Concept of T.P.S, Legal Provision, Relation with D.P., Original Plot, final Plot, Semi-final Plot, Incremental Contribution (Betterment charge), Rationale for charging Incremental Contribution, Function of Arbitrator, Advance Possession, Amenities, partially beneficial, Cost of Scheme. Municipal Act, MR and TP Act 1966, LA Act. 1894, LARA 2013, SEZ, DCR.	08
Unit 4	Introduction to Smart Cities: Definition, Concept, Need and importance, Benefits of smart cities, History of Smart city in India, Features & components of a smart city, Characteristics and factors of smart cities, Smart structures, Classification of smart structures, Challenges faced in developing smart cities,	09

Smart Cities Laboratory Course Contents:	
Expt. No.	Title of Experiment
1	Mini Project
	Identify the town for development planning based on SWOC analysis.
	Conduct surveys for regional plan and development plan.
	Apply different planning schemes based on various acts.
	Prepare the final report and presentation on projected cost analysis
	Model preparation on smart city
2	Assignments
	Technology involved in different construction of smart building.
	Smart material associated with smart building
3	Case Studies
	Case study on smart city

Course Details:

Class	B. Tech, Sem.- VI (Elective)		
Course Code and Course Title	2CVPE321, Engineering Geology		
Prerequisite/s	2CVPC302		
Teaching Scheme: Lecture/Tutorial	03/00		
Credits	03		
Evaluation Scheme	T	ISE / MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE321_1	Apply the knowledge of engineering geology for identification of suitable site for construction depending on physical and chemical properties of minerals and rocks and different geological structures like strike, dip, fold, fault.
2CVPE321_2	Draw cross section structural map to know the subsurface lithology of the area on the basis of given data.
2CVPE321_3	Compare types of aquifers, landslides and seismic waves to acquire knowledge about groundwater, landslides and earthquake respectively based on rock types and its mechanical properties.
2CVPE321_4	Evaluate suitable and unsuitable sites to construct major civil structures like dam, tunnel and bridges on the basis of surface and subsurface investigation method
2CVPE321_5	Compare types of aquifers, landslides and seismic waves to acquire knowledge about groundwater, landslides and earthquake respectively based on rock types and its mechanical properties.
2CVPE321_6	Interpret field characteristics of minerals and rocks through detail report of field work to showcase properties and structures.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction & Physical Geology: Definition, Branches of geology useful to civil engineering, Importance of geology from Civil Engineering point of view, Case studies of case histories of failure of some civil engineering structures due to geological draw backs, Interior of the Earth Weathering - Types and civil engineering significance. River and its action.	07
Unit 2	Mineralogy & Petrology: Classification of minerals, physical properties of minerals, use of minerals in the production of construction material Igneous rocks: Origin, Concordant and discordant forms, Civil Engineering significance. Secondary rocks: Process of formation, Classification, Civil Engineering significance. Metamorphic rocks: Agents and Types of Metamorphism, Civil Engineering	07

Head of Department

Dean Academics

Executive Director

	significance.	
Unit 3	Structural Geology: Strike and Dip & Civil Engineering significance. Unconformity-Types & Civil Engineering significance. Fold and Fault: Parameters, Types, Causes, Civil Engineering significance. Joint: Types, Civil Engineering considerations.	06
Unit 4	Dynamic Geology & Groundwater: Earthquake: Terminology, Causes, Seismic waves, Seismograph, Seismogram, Scale, Effects, RIS. Landslides: Types, Causes, Prevention of Landslides. Groundwater: Sources of groundwater, Zones of groundwater, Types of Aquifers, porosity & permeability. Building Stones: Engineering properties of rocks, Requirement of good building stone.	07
Unit 5	Geological Investigations: Preliminary Geological Investigations Exploratory drilling: Observations, Preservation of cores and Core logging, Core recovery, R.Q.D. Geology of Tunnel and Bridge: Difficulties during tunneling Influence of geological conditions on tunneling, Geological consideration while choosing tunnel alignment, Tunnel in folded strata, sedimentary rocks and Deccan traps. Dependence of types of bridges on geological conditions.	06
Unit 6	Geology of Dams and Reservoirs: Influence of geological conditions on Location, Alignment, Design and Type of a dam, Suitable and Unsuitable geological conditions for locating a dam site, Dams on carbonate rocks, sedimentary rocks, folded strata and Deccan traps, Suitable and unsuitable geological conditions for reservoir site.	06

Engineering Geology Laboratory Course Contents:

Sr. No.	Title of Experiment
1.	Megascopic study of Rock forming minerals.
2.	Megascopic study of Ore forming minerals.
3.	Megascopic study of Igneous rocks.
4.	Megascopic study of Secondary rocks.
5.	Megascopic study of Metamorphic rocks.
6.	Study of geological maps a) Single horizontal series.
7.	Study of geological maps b) Single inclined series.
8.	Study of geological maps c) One horizontal and one inclined series.
9.	Study of geological maps d) Both series are inclined.
10.	Study of geological maps e) Both series are inclined with sill.
11.	Study of geological maps f) Both series are inclined with dyke.
12.	Study of 3D structural models.
13.	Study tour to the places of Engineering Geological importance.

Course Details:

Class	T. Y. B. Tech. Sem.-VI
Course Code and Course Title	2CVSA322, Remote Sensing and GIS
Prerequisites	2CVSA213, 2CVSA309
Teaching Scheme: Lecture/Tutorial	03/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVSA322_1	Analyze remote sensing data to identify patterns and trends of spatial data using GIS tools.
2CVSA322_2	Evaluate the effectiveness of different remote sensing techniques in solving engineering problems using spatial analysis tools.
2CVSA322_3	Apply GIS methods to solve spatial problems encountered in diverse engineering domains using remote sensing data.
2CVSA322_4	Create maps and visualizations to communicate spatial information effectively using GIS Software's.
2CVSA322_5	Demonstrate an understanding of the principles behind remote sensing and GIS technologies using GIS based applications.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Remote Sensing: Overview of Remote Sensing, Electromagnetic Spectrum and Remote Sensing, Types of Remote Sensing Platforms (Satellites, Aircraft, UAVs), Types of Remote Sensing Sensors (Passive vs. Active), Remote Sensing Image Acquisition and Processing.	07
Unit 2	Remote Sensing Data Analysis: Image Interpretation Techniques, Image Enhancement and Classification, Digital Image Processing Methods, Introduction to Image Analysis Software (e.g., ENVI, ERDAS Imagine)	07
Unit 3	Geographic Information Systems (GIS) Fundamentals: Introduction to GIS, Basic Concepts of Spatial Data, GIS Data Models (Raster vs. Vector), Coordinate Systems and Map Projections, GIS Data Collection Methods	06
Unit 4	GIS Data Analysis: Spatial Analysis Techniques (Overlay, Buffering, Interpolation), Attribute Data Analysis, Introduction to GIS Software (e.g., ArcGIS, QGIS), Hands-on Exercises on GIS Data Analysis	06

Head of Department

Dean Academics

Director

Executive Director

Unit 5	Integration of Remote Sensing and GIS: Remote Sensing Data Integration with GIS, Applications of Remote Sensing and GIS in Engineering Domains (e.g., Agriculture, Urban Planning, Environmental Engineering), Case Studies and Examples of Remote Sensing and GIS Integration Projects	06
Unit 6	Advanced Topics and Applications: Remote Sensing and GIS in Disaster Management, Remote Sensing and GIS in Climate Change Studies, Emerging Trends in Remote Sensing and GIS Technology, Future Directions and Career Opportunities in Remote Sensing and GIS	07

Text Books:

Sr. No	Title	Author	Publisher	Edition	Year of Edition
01	Remote Sensing and GIS	Basudeb Bhatta	Oxford University Press	1 st	2017
02	Remote Sensing and GIS Integration: Theories, Methods, and Applications	Qihao Weng	McGraw-Hill Education	1 st	2009
03	Principles of Remote Sensing	Floyd F. Sabins	American Society for Photogrammetry and Remote Sensing	1 st	2007
04	Remote Sensing and Image Interpretation	Thomas Lillesand, Ralph W. Kiefer, and Jonathan Chipman	Wiley	8 th	2014

Course Details:

Class	T. Y. B. Tech. Sem.-VI
Course Code and Course Title	2CVEN323, Solid Waste Management
Prerequisites	2CVHS206, Environmental Studies
Teaching Scheme: Lecture/Practical/ Tutorial	03/00/00
Credits	03
Evaluation Scheme: ISE /MSE / ESE	40/30/30

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEN323_1	Apply various methods for the quantitative assessment of solid waste and its sampling and characterization techniques.
2CVEN323_2	Analyse collection routes to enhance the efficiency of solid waste collection services.
2CVEN323_3	Select transport means and collection routes for solid waste transfer operations.
2CVEN323_4	Select waste treatment process to enhance the efficiency and effectiveness of solid waste management systems.
2CVEN323_5	Develop expertise in managing hazardous waste, including understanding its sources, classification, and treatment options.
2CVEN323_6	Classify hazardous waste, using its properties to treat & dispose it safely.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Sources and Characterization Definition - Sources and types of solid waste- composition and its determinants of Solid waste-factors influencing generation-quantity assessment of solid wastes-methods of sampling and characterization.	07
Unit 2	Collection and Transport Collection of Solid waste, collection services, collection system, equipment, time and frequency of collection, labour requirement, factors affecting collection, analysis of collection system, collection routes, route optimization, preparation of master schedules.	06
Unit 3	Transfer and Transport Need for transfer operation, transfer stations, types, transport means and methods, location of transport stations, Manpower requirement, collection routes: Transfer stations, selection of location, types & design requirements, operation & maintenance.	07
Unit 4	Processing Techniques and Energy Recovery Processing techniques, purposes mechanical volume reduction, necessary	07

Dean Academics

Director

Executive Director

	equipment, chemical volume reduction, incinerators, mechanical size reduction selection of equipment's, components separation, methods, drying and de-watering. Recovery of Resources, conversion products and energy recovery, recoverable materials, processing and recovery systems, incineration with heat recovery.	
Unit 5	Treatment and Disposal Treatment methods, various methods of refuse processing, recovery, recycle and reuse, composting, aerobic and anaerobic, incineration, pyrolysis and energy recovery. Disposal methods, Impacts of open dumping, site selection, sanitary land filling, design criteria and design examples, leachate and gas collection systems, leachate treatment.	06
Unit 6	Biomedical, Hazardous & E-Waste Biomedical Waste management, sources, treatment and disposal Hazardous Waste Management- Introduction, Sources, Classification, Physico-chemical, Chemical and Biological Treatment of hazardous waste, regulations. E-waste management - sources, treatment and disposal	06

Course Details:

Class	T.Y.B. Tech, Sem.-VI
Course Code and Course Title	2CVVS324, Structural Design And Drawing – I (Mini Project)
Prerequisite/s	2CVVS301
Teaching Scheme: Practical	02
Credits	01
Evaluation Scheme: ISE/ ESE	50/50

Course Outcomes: Upon successful completion of this course, the student will be able to analyze and design the following steel structures as per BIS 800: 2007 (General Construction in Steel):

2CVVS324_1	Discuss different types truss, components of trusses and loads for industrial shed as per IS code provision.
2CVVS324_2	Compute the components of given project by using analytical methods
2CVVS324_3	Design the components analytically of given project by using Limit state method
2CVVS324_4	Make a drawing designed components of given project using modern tools /Autocad.
2CVVS324_5	Analyse and design the components of given project by using Finite element software.

Course Contents:

The term work shall consist of detailed structural design and drawing of the following steel structure along with necessary drawings.

01	INDUSTRIAL SHED Design of industrial shed including roof truss (Roof truss: assessment of dead load, live load and wind load, Load calculation by graphical method, design of purlin, design of members of a truss, detailing of typical joints and supports), purlin, gantry girder (Design of gantry girder: Selection of gantry girder, design of cross-section, check for moment capacity, buckling resistance, bi-axial bending, deflection at working load and fatigue strength.), roof and gantry columns, bracing system, column bases and connections.
02	ANY ONE OF THE FOLLOWING: a) WELDED PLATE GIRDER: Design of welded plate girder, the design of cross section, curtailment of flange plates, stiffeners and their connections. b) FOOTBRIDGE Influence lines, cross beam, main truss, Raker, joint Details, support details c) BUILDING FRAMES Building with Secondary and main beams, column and column bases, beam-to-beam connection, column-beam-connection, the design of typical members. Secondary and main

Head of Department

Dean Academics

Director

Executive Director

	beam arrangement for the floor of a building, design of beam to beam and beam to column connections using bolt / weld.
Term work will consist of the following.	
Four full imperial size drawing sheet showing structural detailing of sketches based on the syllabus.	
A.	Design of industrial building including roof truss, purlin, bracings, gantry girder, column, column base, and connections. Three full imperial size drawing sheets.
B.	Design of welded plate girder the design of cross section, curtailment of flange plates, stiffeners and connections. One full imperial size drawing sheets.
OR	
B.	Design of foot Bridge including Influence lines, cross beam, main truss, Raker, joint Details, support details. One full imperial size drawing sheets.
OR	
B.	Design of Building Frame including Secondary and main beams, column and column bases, beam-to-beam connection, column-beam-connection, the design of typical members. Secondary and main beam arrangement for the floor of a building, design of beam to beam and beam to column connections using bolt / weld. One full imperial size drawing sheets.
Note:	
Sample verification of analysis results shall be made by using software for any one problem.	
For drawing sheets use Auto-Cad software, if necessary, wherever use hand drawing sheets	
A maximum number of students in a group not more than two (02) for design	
4. Two site visits on selected design: Report should contain structural details with the sketch

Course Details:

Class	T. Y. B. Tech, Sem.-VI
Course Code and Course Title	2CVEL325, Software Training I
Prerequisite/s	----
Teaching Scheme: Lecture/Tutorial/Practical	00/00/02
Credits	01
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

1CVES368_1	Apply software skills in the field of Civil Engineering.
1CVES368_2	Perform structural analysis and evaluate results.
1CVES368_3	Compute various technical parameters with the help of software.
1CVES368_4	Prepare professional reports and presentations
1CVES368_5	Apply software tools for interpreting and utilizing geospatial data in civil engineering applications

Course Contents:

1	The lab work shall consist of Software training . List of Software training floated by Department will be in the field of: 1. Structural Design 2. Construction Planning and Management 3. Transportation Engineering 4. Environmental Engineering 5. Quantity Estimation 6. Geospatial Data Management and Analysis
	1. Structural Design (Staad Pro, E-Tab etc.) 2. Analysis & design of structural members and System by any design software. 3. Construction Planning and Management (MSP, Primavera, etc.) 4. Planning of all construction activity and management of them by any software. 5. Transportation Engineering (IIT pave, VISSIM, etc.) Analysis and Design of pavement by any Software. 6. Environmental Engineering (EPANET, etc.) Pipe network analysis. 7. Geospatial Data Management and Analysis (QGIS etc.)

Prerequisite/s	2CVCC313,
Teaching Scheme: Lecture/Tutorial/Practical	00/00/02
Credits	01
Evaluation Scheme: ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVCC326_1	Solve problem based on basic and advance probability, Permutation and Combination
2CVCC326_2	Solve problem based on Syllogism, graphs, data interpretations
2CVCC326_3	Solve problem based on gaming round
2CVCC326_4	Demonstrate on Resume writing skill, closed, advanced grammar, Synonyms and Antonyms

Course Syllabus

Course Contents:		
Unit No.	Title	Hrs.
Unit 1	Advance Probability Advance Permutation Combination	04
Unit 2	Statement Assumption Syllogism	04
Unit 3	Mixed Bar Graph, Pie Chart Data Interpretation (Avg & Ratio Proportion based)	04
Unit 4	Gaming Round OR Capgemini Part 1 Gaming Round OR Capgemini Part 2	04
Unit 5	Company Specific Revision for arithmetic (S.T.D., Time Rate Work) Revision of Calendar Reminder theorem Power Cycle	04
Unit 6	Verbal Ability Revision Part 1 Verbal Ability Revision Part 2 Interview Etiquettes & Grooming	04

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVPC401, Earthquake Resistant Structures		
Prerequisites	2CVBS111, 2CVPE321		
Teaching Scheme: Lecture/Practical/Tutorial	03/00/00		
Credits	03		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	--

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPC401_1	Comprehend engineering seismology and different terminologies related to earthquakes.
2CVPC401_2	Compute characteristics of earthquakes and their effect on structures.
2CVPC401_3	Find the response of structures subjected to earthquake loads for various building configurations.
2CVPC401_4	Design earthquake-resistant structures as per IS Code Provisions.
2CVPC401_5	Critique various retrofitting/strengthening techniques and control systems.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Seismology: Elements of seismology – terminology, structure of earth, causes of an earthquake, plate tectonic theory, continental drift theory, elastic rebound theory, seismic waves, magnitude and intensity, methods of measurement, energy released, seismograph, strong motion earthquakes, prominent earthquakes of India.	05
Unit 2	Fundamentals of theory of vibration: Earthquake response of SD of system, Spring parallel and series theory, free and forced vibrations (harmonic loading) of single degree of freedom systems. Undamped and viscously damped vibrations, equation of motion and solution. Duhamel's Integral, Introduction to MDOF.	08
Unit 3	Masonry structure: Masonry Structures: Behavior of unreinforced masonry and reinforced masonry, RC bands, vertical reinforcement, openings, Provisions of I.S. 4326, Repairs and strengthening of masonry and RC members.	06
Unit 4	Response spectrum method: Response spectrum theory: Earthquake response spectrum, seismic coefficient method, tripartite spectrum, construction of design response spectrum, effect of foundation soil and structural damping on design spectrum, evaluation of lateral loads due to earthquake on multistory buildings as per IS 1893 Part I – 2016. Introduction to response spectra, Time history analysis, P – Delta Analysis, Push over analysis.	09
Unit 5	Design principles of Earthquake Resistant Structures: Planning aspects, Load path, Stiffness and strength distribution, different structural system, Design philosophy, Behavior of RC building, ductility and ductile detailing of beam and columns using IS 13920. liquefaction, and settlement.	06

Unit 6	Earthquake resistant modern techniques: Introduction to Earthquake resistant modern techniques – Base Isolation – Elastomeric, Sliding, Combined. Seismic Dampers - Friction Dampers, TMD, Visco elastic dampers	05

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVVS402, Quantity Surveying and Valuation		
Prerequisites	2CVPC203, 2CVPC217		
Teaching Scheme: Lecture/Practical/Tutorial	03/02/00		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE/ESE	50/50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVVS402_1	Utilize specifications and their types for estimating a building by using various type of estimate.
2CVVS402_2	Compute quantities and rates for various items of construction for estimate of construction project by using rate analysis.
2CVVS402_3	Classify different types of contracts to understand their legal validity in construction projects.
2CVVS402_4	Evaluate the value of land and existing properties by various valuation methods.
2CVVS402_5	Make schedule of reinforcement for steel detailing of various RCC elements by quantity surveying techniques.
2CVVS402_6	Estimate various quantities of a G+1 building and prepare a detailed estimate by different estimation methods.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Elements of Estimating: Purpose and types of Estimates, Units and mode of measurement, IS 1200 & SP 27, Schedule of rates (SSR), Administrative approval and technical sanction, Various items to be included in estimates, Measurement sheet and abstract sheet, Use of excel spread sheets for estimating. Specifications: Purpose and basic principle of general and detailed specifications.	05
Unit 2	Quantity Surveying: Prime cost, Provisional sum, Provisional quantities, Taking out quantities by long wall – short wall method and center line method, Preparation of schedule for steel as reinforcement.	08
Unit 3	Detailed Estimate: Detailed estimate of residential building, Road, Earthwork for canal etc. Rate Analysis: Factors affecting, Material required, Task work, Labour required, Plant and equipment cost, Overhead charges, Rates for various items of work, Price escalation	06
Unit 4	Contracts: Necessity, Types of contracts, Various conditions of contract, Earnest money, Security deposit, PWD procedure of execution of civil engineering work, Rights of parties and responsibilities of contracts. Indian Arbitration and Conciliation Act 1996. (Introduction to FIDIC Contract). Tender: Tender, Types of tenders, concept of e-tendering, application of e-tendering, invitation of tender notice, documents, methods of preparation and submission of tenders by two envelop method	06

Unit 5	Valuation: Definition of value, price and cost, Different types of values, valuation, Necessity of valuation, factors affecting valuation, Valuation from yield and from life, gross yield and net yield, outgoing, capitalized value, Year's purchases, Sinking fund.	07
Unit 6	Valuation Methods: Rental method of valuation- Form of rent, different types of rent, standard rent, belting method of valuation, Development method of valuation for building estate, Valuation on profit base, Depreciation, different methods of calculating depreciation – straight line method, declining balance method, sinking fund method, quantity survey method, Obsolescence. (Procedure for Valuator)	07

02	Estimating and Costing for Building and Civil Engineering Works Based on Indian Standard Method of Measurement (I.S.1200)	P. L. Bhasin	Chand Publisher	7th	2019
03	Standard Specification Vol. I & II	—	PWD, Maharashtra	—	2019

Codes:

1. **IS 1200 (1992)**- The Method of Measurement of General and Civil Engineering Works
2. **IS 1911:2017** – Schedule of Rates for Building Works.
3. **SP: 27 (1987)** -Practice for the Measurement of Building Works.
4. **IS 10067:1982** – Material Constants in Building Works (for cost estimation).
5. **IS 13005:1991** – Guidelines for Tendering Procedures.
6. **IS 4031 (Part 1 to 15)** – Testing methods for materials affecting valuation.

Course Contents:	
Expt. No.	Title of Experiment
1	Prepare detailed specification of any five civil engineering items. (Data should be collected from construction site)
2	Prepare rate analysis of any ten civil engineering items of work.
3	Prepare Bar Bending Schedule- column and column footing, Beam
4	Prepare Bar Bending Schedule - Slab, Retaining wall etc.
5	Prepare detailed Estimate of various civil engineering construction works. (any Two) Canal, Water tank, Road etc.
6	Collect G+1 municipal drawing of residential RCC framed building & prepare detailed estimate of this residential RCC framed building. Note: Use excel spreadsheet/ Estimator software for preparation of measurement & abstract sheet.
7	Collect Tender document of any one civil engineering work, by reference of this prepare one tender document for any one civil engineering construction work.
8	Prepare Valuation report of existing residential building.

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVHS403, Project Management and Finance		
Prerequisites	2CVHS206		
Teaching Scheme: Lecture/Tutorial	02/00		
Credits	02		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	-

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVHS403_1	Apply project management principles to initiate, plan, execute, monitor, and control on various construction projects.
2CVHS403_2	Analyze project feasibility considering technical, economic, and financial aspects by using CPM, PERT & MSP.
2CVHS403_3	Estimate project costs, schedule tasks, and allocate resources effectively to construction project.
2CVHS403_4	Identify risk associated with construction project using appropriate techniques.
2CVHS403_5	Apply financial principles to project budgeting, cash flow management, and investment appraisal by various economics methods.
2CVHS403_6	Evaluate the progress of construction projects and present the results in a structured report for stakeholders.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Project Fundamentals: Definition and characteristics of a project, Project life cycle and its phases, Project management methodologies (e.g., Agile, Waterfall, Scrum), Stakeholder analysis and management, Introduction to Project Management Professional (PMP) framework	04
Unit 2	Project Planning & Scheduling: Work Breakdown Structure (WBS) development, Activity definition and sequencing, Critical Path Method (CPM) and Program Evaluation and Review Technique (PERT), Resource allocation and leveling, Project scheduling tools (e.g., Gantt charts, MS Project)	04
Unit 3	Project Cost & Risk Management: Cost estimation techniques (e.g., Parametric, Analogous, Bottom-up), Cost budgeting and control, Earned Value Management (EVM), Cost-benefit analysis and return on investment (ROI), Risk identification and assessment, Qualitative and quantitative risk analysis technique, Risk response planning (mitigation, avoidance, transference, acceptance), Contingency planning and reserves	05
Unit 4	Project Execution and Control: Activity Planning, Team Building and Management, Stakeholder Engagement, Project Monitoring & Control Performance Measurement, Change Management, Issue Resolution, Quality Management: Quality Planning, Quality Assurance, Continuous Improvement, Project Challenges and Solutions	04
Unit 5	Project Communication & Finance: Communication planning and channels, Stakeholder communication strategies, Report writing and presentations, Conflict resolution and negotiation, Time value of money concepts, Capital budgeting techniques (e.g., NPV, IRR, Payback period),	04

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVPE404, Repair and Rehabilitation of Structures		
Prerequisites	2CVPC210, 2CVPE317		
Teaching Scheme: Lecture/Practical/Tutorial	03/02/00		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE404_1	Choose the type of maintenance required for structure by visual inspection.
2CVPE404_2	Examine the causes of deterioration in masonry, steel and RCC structures using physical and chemical causes of deterioration.
2CVPE404_3	Determine the damage and assess the structures using destructive, semi destructive and non-destructive techniques.
2CVPE404_4	Recommend technique of repairing for different structures using appropriate materials
2CVPE404_5	Summarize actions taken to upgrade the seismic resistance of existing structure by using seismic retrofitting techniques.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction: Maintenance and Repair Maintenance & its classification, repair, retrofitting, re-strengthening, rehabilitation and restoration, Necessity, objective, importance and factors affecting maintenance and repairs, Various aspects of Inspection, Assessment procedure for evaluating a damaged structure, aging of structures.	06
Unit 2	Distress in R.C.C. Steel Structures and load bearing Deterioration and its types, causes of deterioration, effect of damage, effect of climate, temperature, corrosion of steel reinforcement and its causes, Mechanism and prevention, strength, durability and thermal properties of building material, damages to masonry structures.	07
Unit 3	Damage Assessment and Evaluation Method Assessment procedure, Visual inspection, Damage testing methods, Nondestructive testing techniques, semi destructive techniques, and destructive testing method and core samples.	06
Unit 4	Materials for Maintenance and Repair Repair materials-Variou repair materials, Criteria for material selection, Methodology of selection, Health and safety precautions for handling and applications of repair materials, Special mortars and concretes-Polymer Concrete and Mortar, Quick setting compounds, Grouting Materials-Gas forming grouts, Sulfamate grouts, Polymer grouts, Acrylate and Urethane grouts, Bonding agents-Latex emulsions, Epoxy bonding agents, Protective Coatings-Protective coatings for Concrete and Steel, FRP sheets	06
Unit 5	Repair Methods and Techniques Crack repair-Variou methods of crack repair-Gunite and Shotcrete, Epoxy injection, Mortar repair for cracks, Routing and sealing, Stitching, Dry packing, Autogenous healing, Overlays, Repair to active cracks, Repair to dormant cracks. Corrosion of embedded steel in concrete- Corrosion of embedded steel in concrete, Mechanism, Stages of corrosion damage, Repair of various corrosion damaged of	07

	structural elements (slab, beam and columns) Methods of corrosion protection, corrosion inhibitors, corrosion	
Unit 6	Retrofitting Method Seismic retrofitting of reinforced concrete building, flow of retrofitting process, consideration in retrofitting of structures; source of weakness in RCC frame building, Jacketing, Column jacketing, Beam jacketing, Beam Column joint jacketing, Reinforced concrete jacketing, steel jacketing, FRP jacketing, steel structure strengthening, Beam shear strengthening, Flexural strengthening.	07

- Codes:** 1. IS 516: 2021 (Part 5 - Non-Destructive Testing Section 2 "Half-Cell Potentials of Uncoated Reinforcing Steel in Concrete" 2021
2. IS 1893-2202
3. IS 3935-2009: Seismic Evaluation, Repair and Strengthening of Masonry Buildings
4. ACI 562:21 Code Requirements for Evaluation, Repair, and Rehabilitation of Concrete Buildings.

Expt. No.	Title of Experiment
1	To measure the rate of corrosion in steel reinforcement using corrosion meter.
2	To compare the effectiveness and limitations of different NDT methods in assessing concrete quality.
3	To assess the residual strength of damaged concrete beams and evaluate the effectiveness of repair techniques.
4	To find the strength of a concrete column with fiber wrapping.
5	To study the methods of seismic retrofitting.
6	To take and test concrete core samples for assessing its quality.
7	To apply the guniting or shotcreting techniques in repairing structures.
8	Case study report of structural damage and repair/rehabilitation project.

**Member Secretary-BOS****Chairman-BOS****Member Secretary-AC****Chairman-AC**

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVPE405, Advanced Construction Techniques		
Prerequisites	2CVPC210, 2CVPC217		
Teaching Scheme: Lecture/Practical/Tutorial	03/02/00		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE405_1	Identify the formwork system for different civil engineering structures by using their suitability aspects.
2CVPE405_2	Select advanced construction method for different Civil Structures, for pile construction and underwater construction as per feasibility and suitability.
2CVPE405_3	Choose suitable repair and maintenance techniques for soil and structural components using different type of grout.
2CVPE405_4	Classify the construction methods for prefabricated structures and girders by adhering to launching techniques.
2CVPE405_5	Apply advanced construction techniques, including equipment selection, formwork systems, and innovative methods, to solve practical engineering challenges with efficiency and sustainability.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Formwork: - Material for formwork, special types of formworks – Aluminum forms, Tunnel Formwork System, Ganged Forming System, and Flying Formwork Systems, Vertical Slip formwork, Table formwork, failure of formwork, safety, and formwork economy.	06
Unit 2	Construction Techniques Roller –compacted concrete, slip form in pavement construction, vacuum dewatering in concrete slab construction, reinforced earth construction, and advanced method of diaphragm wall construction. Trenchless technology - Box jacking- pipe jacking, Lean Construction, Self climbing formwork	07
Unit 3	Grouting Methods: Cement grouting, chemical grouting, – grouts for injection of fine sands, resin grouting polymerization technique, clay grouting, Asphalt Grouts Grouting Procedures – Pre grouting site investigation, grout holes pattern, grouting plant and equipment, injection methods, Grout injection measurement and monitoring- field procedure, curing less concrete, applications and limitations.	07
Unit 4	Underwater Construction Problems Encountered, Underwater drilling, blasting, concreting and welding, Underwater structural concrete walls. Protection of structures against attack by ground water.	06
Unit 5	Pre-fabricated Construction: Types, Sizes and Economy, Fabrication techniques, Transportation, Erection, Jointing of Components, Light Weight Panels and Standardization of Components. Girder launching for bridges: Launching Girder Slightly Longer Than One Span, Launching Girder Slightly Longer Than Two Spans, Balanced Cantilever Construction, Progressive Placement	07

	Method, Incremental Launching, Span-By-Span Erection, Falsework – Stationary, Traveling.	
Unit 6	Pile Driving – Pile driving equipment- Types, pile driving hammers, single acting and double acting, differential acting hammers, hydraulic and diesel hammers, vibratory drivers.	06

11. **IS 3764:1992** – Safety Code for Excavation Work.

Course Contents:

At least 8 experiments:

Expt. No.	Title of Experiment
1	Prepare advanced list of equipment using on construction site including its selection criteria and its advantages.
2	Case study presentation and report submission on different types of formwork systems are available and its selection criteria.
3	Case study presentation and report submission on vaccum dewatering method in construction.
4	Case study presentation and report submission on different types of grouting materials and methods.
5	Case study presentation and report submission on pilling construction methods
6	Case study presentation and report submission on underwater construction methods.
7	Case study presentation and report submission on prefabrication methods
8	Case study presentation and report submission on retaining structure construction methods.
9	Case study presentation and report submission on different types of slip formwork in pavement construction.
10	Prepare a site visit report regarding your visit in which erection of steel structure work is going on
11	Prepare a Seminar Presentation: Topic of Seminar shall be given to a group of students. The students are required to submit and present / defend the Seminar in presence of students and teachers
12	Prepare a Case Study Report: Based on advanced construction technology curriculum, on any one related topic narrating the case with specific operations/problems faced/resolved from nearby construction work area with short details

* Report consists of Name of the site; advanced Method used on site and its reasons, list of equipment used on site, detailed explanations of procedure used on site

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVPE406, Air Pollution and Control		
Prerequisites	2CVHS206		
Teaching Scheme: Lecture/Tutorial/Practical	03/00/02		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE406_1	Analyze air pollutants & their effects on human health, ecosystems, and materials.
2CVPE406_2	Evaluate critical global air quality issues such as acid rain, global warming, and ozone depletion, and propose mitigation strategies.
2CVPE406_3	Utilize meteorological data and models to predict the dispersion and impact of air pollutants.
2CVPE406_4	Identify air pollution control technologies for particulate and gaseous emissions in industry.
2CVPE406_5	Assess the environmental impact of vehicular pollution and recommend control measures
2CVPE406_6	Interpret AQI data, and apply legislative frameworks for pollution control.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to Air Pollution: Scope, significance, Air pollutants – Classification – Natural and Artificial- Primary and Secondary, Point and non-point and Aerial sources of air pollution- Stationary and mobile sources. Effects of air pollution on Human Health, Animals, Plants, and Materials. Case Study - Bhopal Gas Tragedy.	07
Unit 2	Burning Environmental Issues: Acid rain, Global warming, Ozone depletion in the stratosphere, Indoor air pollution, Climate change. Case studies on global environmental challenges. Role of technological advancements in mitigating burning issues.	06
Unit 3	Meteorology and Air Dispersion: Meteorological variables, Lapse Rate, Inversions, Stability conditions, Wind rose, General characteristics of Stack plumes, Meteorological models for air pollution dispersion. Introduction to air modelling software: AERMOD VIEW	07
Unit 4	Control of Particulate Matter: Control at source, Process changes, Equipment Modification, Study of air pollution control equipment's – Settling Chambers, Centrifugal separators, Filters dry and wet scrubber, Electrostatic precipitators.	07
Unit 5	Air Pollution Due to Vehicles: Traffic as a source of air pollution: Pollutants, detrimental effects, and mitigation measures. Traffic management systems for air quality improvement. Introduction to Automobile air modelling software: CALROADS VIEW	06
Unit 6	Ambient Air Quality Monitoring (AAQM) and Standards: Definition and Importance of AAQM. Continuous Emission Monitoring System (CEMS). Air Quality Index - Definition, Purpose, Study of AQI of major cities. Standards and Legislation: National Ambient Air Quality Standards (NAAQS) in India. Highlights of the Air (Prevention and Control of Pollution) Act, 1981.	06

2. IS 5182 - Methods for Measurement of Air Pollution
3. IS 9659 - Principles for Control of Pollution in Industries

Course Contents:**At least 8 experiments along with visit is compulsory:**

Expt. No.	Title of Experiment
1	Quantitative Measurement of Particulate Matter in Ambient Air Using Gravimetric Methods
2	Comprehensive Study of Meteorological Variables and Their Impact on Air Quality
3	Preparation and Interpretation of Wind Rose Diagrams Using WRPLOT View Software
4	Assessment of Automobile Emissions Using Exhaust Gas Analyzer for Air Pollution Studies
5	Calculation and Interpretation of the Air Quality Index (AQI) for Urban Environments
6	Monitoring and Evaluation of Indoor Air Quality in Various Residential and Commercial Settings
7	Simulation and Analysis of Acid Rain Formation Using Controlled Laboratory Conditions
8	Air Dispersion Modeling and Prediction of Pollutant Spread Using Wind Trax Software
9	Industrial Visit and Demonstration of Air Pollution Control Equipment for Practical Insights

Course Details:

Class	B. Tech. Sem.-VII		
Course Code and Course Title	2CVPE407, Pavement Design & Analysis		
Prerequisites	2CVPC302, 2CVPC303		
Teaching Scheme: Lecture/Practical/Tutorial	03/02/00		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE407_1	Identify different stresses and deflections in flexible pavements.
2CVPE407_2	Discover different stresses and deflections in rigid pavements.
2CVPE407_3	Design flexible and rigid pavement using various methods.
2CVPE407_4	Utilize the method of overlay over flexible and rigid pavements.
2CVPE407_5	Develop reliable pavement systems using probabilistic methods
2CVPE407_6	Evaluate the distress condition of flexible pavements using various techniques.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction: Historical developments in pavement design, Types of pavements, Road tests, Introduction to SHRP and NCHRP, Introduction to various methods of pavement design: Empirical, mechanistic and mechanistic empirical, Design factors: Traffic loading, Environment, Materials, Failure criteria and reliability.	07
Unit 2	Design of Flexible Pavement Methods: Empirical, semi-empirical and theoretical approaches, development, principle, design steps, advantages and application of the different pavement design methods McLeod Method, CBR Method, including IRC: 37-2019.	06
Unit 3	Analysis and design of rigid pavements: Types of Stresses and Causes, Factors influencing Stresses in rigid pavements; Wheel Load Stresses, Warping Stresses, Friction Stresses, Types of Joints in Cement Concrete Pavements and their Functions, Joint Spacing, Design of Slab Thickness, Design of Joint Details for Longitudinal Joints, Contraction Joints and Expansion Joints, Design of rigid pavements as per IRC 58:2015 and AASHTO method, Analysis of rigid pavements in IITPAVE and KENPAVE	06
Unit 4	Pavement Evaluation: Visual rating, Pavement Serviceability Index, Roughness, Skid resistance and Deflection measurements, crack pattern analysis, Use of modern equipment for pavement surface condition measurements-Analysis of data, interpretation and application, Functional evaluation, joint failure analysis, Structural evaluation of flexible pavements by rebound deflection method, analysis of data, interpretation and applications, FWD, and Benkelman Beam Deflection Technique (IRC:81-1997).	07
Unit 5	Pavement Reliability: Introduction to reliability in pavement design, Variability in pavement input parameters, Probabilistic methods of pavement design, Statistical concepts, Incorporation of variability into pavement systems as per AASHTO and MEPDG procedures, introduction to Monte Carlo simulation and Rosenbluth method.	07
Unit 6	Pavement overlay: Choice and Design of overlay type and pavement materials over existing flexible and rigid, pavements with different, degrees of distress, types of recent overlay	06

	material, Rehabilitation and Recycling of bituminous pavement. Introduction to drainage design.

4. IRC-82:2015 – Code of Practice for Accelerated Strength Testing and Evaluation of Concrete Road and Air field Constructions
5. IRC-76:1979 – Tentative Guidelines for Structural Strength Evaluation of Rigid Airfield Pavement

Course Contents:

At least 8 experiments/ assignments

Expt. No.	Title of Experiment
1	Assignment on historical developments in pavement design
2	Assignment on a comparative analysis of flexible and rigid pavements, considering structural behaviour, materials, and applications.
3	Assignment on the estimation of traffic loading (ESALs) for a given highway section
4	Perform California Bearing Ratio (CBR) test on soil samples from a proposed highway site and design a flexible pavement using IRC:37-2019.
5	To calculate layer thicknesses for a flexible pavement using the McLeod method.
6	Assignment on the design of a rigid pavement slab thickness and joint details.
7	To conduct a visual survey of a pavement section and evaluate its condition using the Pavement Serviceability Index.
8	Assignment on reliability analysis of pavement
9	Assess an existing pavement section and design an overlay using recent materials.
10	Assignment on the design of a sub-surface drainage system for a highway section.

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVPE408, GIS & Its Applications in Civil Engineering		
Prerequisites	2CVPE308		
Teaching Scheme: Lecture/Tutorial/Practical	03/00/02		
Credits	04		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVPE408_1	Differentiate between vector and raster data models for smooth analysis by understanding their strengths and weaknesses.
2CVPE408_2	Perform basic data processing tasks in GIS with the help of proper formats.
2CVPE408_3	Compare types of web GIS types for applications in relevant field based on accuracy.
2CVPE408_4	Apply techniques for image inpainting to fill missing or damaged regions by using digital image processing tools.
2CVPE408_5	Apply GIS techniques to solve problems in the fields of civil engineering under a specific problem scenario and relevant datasets

Course Contents:

Unit No.	Title	Hrs.
Unit 1	GIS: Introduction, Geographical concepts and Terminology, Difference between Image Processing system and GIS, Utility of GIS. Various GIS packages and their salient features, Essentials components of GIS, Data acquisition through scanners and digitizers	07
Unit 2	Raster and Vector Data: Introduction, Descriptions: Raster and Vector data, Raster Versus Vector, Raster to Vector conversion, Remote Sensing Data in GIS, Topology and Spatial Relationships, Data storage verification and editing	07
Unit 3	Data Processing: Data preprocessing, Georeferencing, Data compression and reduction techniques, Run length encoding, Interpolation of data, Database Construction, GIS and the GPS, Data Output	06
Unit 4	Web Maps & Web GIS: Introduction, Web maps & its types, components and Web GIS advantage, Google Maps, Google Earth, Bhuvan, INDIA-WRIS, Esri ArcGIS Online,	06
Unit 5	Digital Image Processing: Various types of images: PAN, Multispectral, Hyperspectral and High-resolution images, Feature and intensity-based image registration of images, Open-Source Image Processing software and image data. Image compression, Pixel and sub-pixel level target detection and classification, Data fusion methods and applications.	07
Unit 6	Applications of GIS in Civil engineering: Applications in Surveying, Applications in Water Resource Engineering, Applications in Disaster Management, Applications in Transportations, Applications in Environmental Engineering, Applications in Geology	06

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVSA409, DGPS Survey		
Prerequisites	2CVSA213, 2CVSA309		
Teaching Scheme: Lecture/Practical/Tutorial	03/00/00		
Credits	03		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	00

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVSA409_1	Differentiate GPS and DGPS based on accuracy, functionality, and applications by comparing their features and practical relevance.
2CVSA409_2	Describe correction signals and datums in theoretical contexts to clarify their roles in positioning by analyzing their impact on accuracy.
2CVSA409_3	Analyze DGPS error sources like atmospheric delays and multipath effects to propose reduction methods by evaluating their influence on data quality.
2CVSA409_4	Evaluate case studies on DGPS applications across various engineering fields to assess their effectiveness by identifying benefits and limitations.
2CVSA409_5	Apply DGPS concepts to solve theoretical problems related to positioning by interpreting provided datasets and parameters.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Fundamentals of DGPS Surveying: Introduction to DGPS: Concept, history, and evolution. Difference between GPS and DGPS: Accuracy, working principles, and applications. Overview of Global Navigation Satellite Systems (GNSS): GPS, GLONASS, Galileo, BeiDou. Basics of positioning methods: Static, Kinematic, RTK, and PPK modes.	06
Unit 2	Components and Functionality of DGPS: Key components: Base stations, rover units, and communication systems. Correction signals: Concept, generation, and transmission. Understanding reference frames, coordinate systems, and datums. Sources of errors in DGPS: Atmospheric effects, multipath errors, and techniques for error reduction.	06
Unit 3	Data Collection and Processing Techniques: Principles of DGPS data collection: Static and dynamic survey methods. Post-processing of DGPS data: Importance, tools, and workflows. Concepts-of accuracy and precision in DGPS measurements. Role of Continuously Operating Reference Stations (CORS) and augmentation systems (SBAS).	07
Unit 4	Applications of DGPS in Various Disciplines Applications of DGPS include precision alignment of machinery, mapping and monitoring of utility infrastructure, integration with IoT and AI for geolocation-based applications, navigation and mapping in drones and autonomous vehicles, precision farming, environmental monitoring, and resource mapping for sustainable development.	06
Unit 5	Specialized Surveys Using DGPS Control network design: Establishing and densifying ground control points for large projects. Hydrographic surveys: Mapping underwater features and reservoir capacity calculations using DGPS. Geodetic surveys: Applications in large-scale	07

	infrastructure projects and deformation monitoring. Specialized applications: Mining surveys, forestry mapping, and disaster area assessments. Survey planning: Workflow optimization and resource allocation for complex surveys. Standards and protocols: National and international guidelines for DGPS surveys	
Unit 6	Emerging Trends and Future of DGPS Integration of DGPS with GIS, LiDAR, and remote sensing. Emerging technologies: Autonomous vehicles, AR/VR systems, and smart city planning. Advances in satellite-based augmentation systems (SBAS) and their global impacts. Ethical and security considerations in the use of DGPS technology.	07

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVEN410, Environmental Impact Assessment		
Prerequisites	2CVEN310		
Teaching Scheme: Lecture/Practical/Tutorial	03/00/00		
Credits	03		
Evaluation Scheme:	T	ISE /MSE / ESE	40/30/30
	P	ISE	00

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEN410_1	Comprehend the need for and the process of EIA.
2CVEN410_2	Evaluate the environmental impacts of projects using advanced methodologies.
2CVEN410_3	Apply EIA in real-world scenarios and develop mitigation strategies.
2CVEN410_4	Utilize software tools for EIA report generation.

Course Contents:

Unit No.	Title	Hrs.
Unit 1	Introduction to EIA and Its Importance: Concept of Environmental Impact Assessment (EIA), Historical development of EIA, Importance and role of EIA in sustainable development, Types of impacts (positive, negative, direct, indirect, cumulative), Key steps in the EIA process (screening, scoping, baseline study, impact analysis, mitigation, monitoring).	07
Unit 2	Legal Framework and Standards in EIA: Environmental regulations and guidelines in India (EIA Notification 2006, amendments), International frameworks (World Bank guidelines, UNEP policies), Public participation in EIA, Environmental management plans (EMP), Case studies on legal compliance in EIA	06
Unit 3	Methodologies for Environmental Impact Assessment: Baseline data collection and environmental parameters (air, water, soil, noise, biodiversity), Prediction and assessment methodologies (checklists, matrices, overlays, networks), Environmental risk assessment (ERA), Cumulative Impact Assessment (CIA), Introduction to lifecycle assessment (LCA)	07
Unit 4	Applications of EIA in Various Fields: Infrastructure projects: roads, bridges, dams, and urban planning, Industrial and mining projects, Power generation projects (thermal, hydro, nuclear, and renewable energy), Coastal and marine projects, Emerging areas: climate impact assessment and carbon footprint analysis	06
Unit 5	Advanced Concepts and Emerging Trends in EIA: Strategic Environmental Assessment (SEA), Social Impact Assessment (SIA), Ecological Impact Assessment, Environmental audits and monitoring programs, Role of AI and remote sensing in EIA	06
Unit 6	Software Tools and Report Preparation in EIA: Introduction to software tools: ArcGIS and Remote Sensing for mapping and spatial analysis, AERMOD and CALPUFF for air quality modelling, LULC (Land Use Land Cover) analysis tools, Noise prediction and modelling tools, Structure and content of an EIA report, Case studies on EIA reports for real-world projects.	07

Course Details:

Class	Final Year B. Tech. Sem.-VII		
Course Code and Course Title	2CVVS411, Structural Design and Drawing II Lab		
Prerequisites	2CVPC316		
Teaching Scheme: Lecture/Practical /Tutorial	00/04/00		
Credits	02		
Evaluation Scheme:	P	ISE	50
	P	ESE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVVS411_1	Choose primary loads and design load combinations for residential buildings using IS standards and the handbook.
2CVVS411_2	Examine the details of the RCC design data by using drafting software.
2CVVS411_3	Determine the design parameters for the Retaining Wall by using the Limit State Method.
2CVVS411_4	Design the structural component of the residential building manually by using the Limit State Method
2CVVS411_5	Develop a model and analyze the residential building by using any standard software

Course Contents:

The experiments will be divided based on the below contents:

1	This course deals with the design of various structural elements such as R.C. beams, slabs, stairs columns & footings using the modern Limit State Method. The design of these elements is made using the guidelines of I.S. 456:2000, a code of practice for plain & reinforced cement concrete. Analysis and design of RCC framed building- manually and using any standard software, sketching the detailing of the reinforcement. Residential G+2 storied building. (Minimum 150 sq. mt.) The drawings prepared shall indicate ductility details as per the provision in IS: 13920. Drafting of all Designed sections using AutoCAD as per ductility Provisions.
2	Design of Retaining wall (cantilever or counter-fort type)
3	Analysis and design of RCC framed structure using ETAB & RCDC software for G+2 Storied building
4	At least one site visit has to be carried out to demonstrate the onsite detailing and then prepare a site visit Report.

- Note:**
1. Project should be done individually.
 2. All reinforcement Drawing details should be drafted using AutoCAD.

Codes:

1. IS 456: 2000 Plain and Reinforced Concrete - Code of Practice
2. IS 875:1987 (Part 1): The Indian Standard Codes provide design dead loads (Unit weights of building material and stored materials) for buildings and structures.
3. IS 875:1987 (Part 2): Code of Practice for Design Loads (Other Than Earthquake) For Buildings and Structures, Imposed Loads.
4. IS 875:1987 (Part 3): design wind loads for buildings and structures.
5. IS 875:1987 (Part 4): Code of Practice for Design Loads (Other Than Earthquake) for Buildings and Structures, Snow Loads.

Course Details:

Class	Final Year B. Tech, Sem.-VII		
Course Code and Course Title	2CVEL412, Software Training -II		
Prerequisites	2CVVS301, 2CVPC316		
Teaching Scheme: Lecture/Practical/Tutorial	00/02/00		
Credits	01		
Evaluation Scheme:	T	ISE /MSE / ESE	-
	P	ISE	50

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEL412_1	Utilize software tools for innovative design solutions in civil engineering projects.
2CVEL412_2	Demonstrate proficiency in modelling, planning, and analysis of civil engineering systems using advanced software.
2CVEL412_3	Interpret simulation and analysis results to optimize civil engineering designs.
2CVEL412_4	Generate accurate quantity estimates and project schedules using specialized construction software.
2CVEL412_5	Integrate software-based environmental and transportation solutions into sustainable civil engineering practices.

Course Contents:

1	The lab work shall consist of Software training. List of Software training floated by Department will be in the field of: 1. Structural Design 2. Building Modelling 3. Construction Planning and Management 4. Transportation Engineering 5. Environmental Engineering 6. Quantity Estimation 7. Geospatial Data Management and Analysis
	1. Structural Design (RCDC, SAP2000, SAFE etc.) Analysis & design of structural members and System by any design software. 2. Building Modelling (Autodesk Revit, SketchUp) 3. Construction Planning and Management (Primavera etc.) Planning of all construction activity and management of them by any software. 4. Transportation Engineering (VISSIM, Civil 3D, etc.) Analysis and Design of pavement by any Software. 5. Environmental Engineering, Pipe network analysis (GIS Tools etc.). 6. Quantity Estimation (Autodesk Quantity Takeoff, PlanSwift etc.) Estimate the various quantities required in the construction field. 7. Geospatial Data Management and Analysis (ArcGIS etc.)

Course Details:

Class		Final Year B. Tech. Sem.-VII	
Course Code and Course Title		2CVEL413, Project	
Prerequisites		2CVEL325	
Teaching Scheme: Lecture/Practical/Tutorial		00/08/00	
Credits		04	
Evaluation Scheme:	P	ISE	100
	P	ESE	100

Course Objectives:

1. To define and plan a major engineering project.
2. To apply fundamental engineering principles to solve complex problems.
3. To conduct research, analyze data, and interpret results.
4. To develop and implement a project plan effectively.
5. To effectively communicate project goals, methodology, and outcomes through written and oral presentations.
6. To demonstrate critical thinking, problem-solving, and design skills.
7. To gain experience in working independently and as part of a team.

Course Outcomes (CO's): After successful completion of this course, the student will be able to,

2CVEL413_1	Define and plan a major engineering project, considering feasibility, resources, and ethical implications.
2CVEL413_2	Apply fundamental engineering principles and relevant theories to solve complex engineering problems within the project scope.
2CVEL413_3	Conduct thorough research, analyze data effectively, and interpret results to inform project decisions and optimize solutions.
2CVEL413_4	Develop and implement a comprehensive project plan, including timelines, budgets, risk management strategies, and quality control measures.
2CVEL413_5	Communicate project goals, methodology, and outcomes effectively through written reports, presentations, and technical documentation.
2CVEL413_6	Demonstrate critical thinking, problem-solving, and design skills throughout all phases of the project, adapting to challenges and making informed decisions.
2CVEL413_7	Gain practical experience in working independently and collaboratively within a team environment, fostering effective communication and teamwork.

General Guidelines:

1. **Project Scope:** The major project will involve the development and execution of a significant engineering undertaking. This may encompass a wide range of activities, including:
 - **Design Projects:** Creating novel solutions to engineering problems, such as designing new devices, systems, or processes.
 - **Experimental Studies:** Conducting research through experimentation, collecting and analyzing data, and drawing conclusions.

Member Secretary-BOS

Chairman-BOS

Member Secretary-AC

Chairman-AC

- **Computer Simulations:** Utilizing computational models and simulations to investigate and analyze engineering phenomena.

All projects must focus on topics relevant to the specific Department's specialization, ensuring a strong connection to the core curriculum and industry practices.

2. **Project Components:** The successful completion of the major project necessitates the integration of several critical components:

- **Problem Identification & Definition:** Clearly identifying and defining an engineering problem or challenge within the project scope.
- **Literature Review:** Conducting thorough research on existing knowledge, methodologies, and best practices related to the project.
- **Problem Formulation:** Translating the identified problem into a well-defined set of engineering objectives and constraints.
- **Design & Development:** Designing, developing, and implementing solutions, which may include:
 - Conceptual design and ideation
 - Detailed design and prototyping
 - System integration and testing
- **Utilization of Modern Tools & Techniques:** Employing relevant and contemporary engineering tools and techniques throughout the project, such as:
 - Computer-aided design (CAD) software
 - Simulation and analysis software (e.g., FEA, CFD)
 - Data acquisition and analysis tools
 - Project management software

3. **Project Synopsis Submission:** Students are required to submit a project synopsis outlining the proposed major project. This synopsis must include the following:

- **Project Scope:** A clear and concise description of the project, including its objectives, boundaries, and relevance to the chosen area of specialization.
- **Project Objectives:** Specific, measurable, achievable, relevant, and time-bound (SMART) objectives that the project aims to achieve.
- **Methodology:** A detailed description of the project approach, including:
 - Research methodology (e.g., literature review, experimental design, simulation methods)
 - Design and development process (if applicable)
 - Data collection and analysis methods
- **Resources & Tools:** A list of anticipated resources, including:
 - Software (e.g., CAD, simulation, data analysis)
 - Equipment and materials
 - Access to facilities (e.g., laboratories, workshops)
- **Expected Results:** A clear statement of the anticipated outcomes of the project, including:
 - Measurable results (e.g., performance data, design specifications, research findings)
 - Potential impact and contributions

**Member Secretary-BOS****Chairman-BOS****Member Secretary-AC****Chairman-AC**

- **Project Timeline:** A realistic and detailed project schedule, including key milestones and deadlines for completion.

The project synopsis submission serves as a crucial step in the project planning process, ensuring that students have a well-defined plan before commencing their work.

4. **Project Duration:** The project work is structured to be completed over four semesters (6 - 7), with the same group continuing to work under the guidance of the assigned project guide throughout this period.

5. **Group Formation:** Students will typically work in groups of 2 to 4 members to complete the major project. The maximum group size is strictly limited to 4 members.

6. Assessment

- **Project Synopsis & Progress Presentations:** The project synopsis and progress presentations will be evaluated using established rubrics.
- **Project Diary & Report** - The project diary, meticulously maintained throughout the project duration, will be a crucial component of the overall assessment. The final project report will be assessed during the End-Semester Examination (ESE).
- **Project Presentations** - Students will make three presentations before the project evaluation committee. These presentations will be collectively assessed.

In Semester Evaluation	
Particulars	Marks
Synopsys Presentation	10
Progress Presentation-I	10
Progress Presentation-II	15
Progress Presentation-III	15
End Semester Examinations	
Project Work Report	25
Viva-Voce Examination	25

7. Submission Requirements

- **Project Work Diary**
 - **Maintenance:** Meticulously maintained by the group throughout the project duration.
 - **Entries:** Reflects daily or weekly efforts, including project selection, literature review, experimental work, data analysis, and any other relevant activities.
 - **Countersignature:** Weekly countersigned by the assigned project guide.
- **Project Synopsis:**
 - **Format:** Submitted in the prescribed format, including:
 - Project Title
 - Student Names & URN Numbers

Member Secretary-BOS

Chairman-BOS

Member Secretary-AC

Chairman-AC

- Guide's Name & Department
- Project Relevance & Significance
- Comprehensive Literature Review (minimum 10 peer-reviewed journal articles)
- Proposed Work: Objectives, Methodology, and Approach
- Expected Outcomes
- Detailed Budget Estimate
- References (in the specified format)
- **Approval:**
 - Signed by each group member.
 - Approved by the project guide.
 - Endorsed by the Head of the Department.
- **Project Report:**
 - **Format:**
 - Typed report of minimum 50 and maximum 100 pages.
 - Adheres to the standardized format for page size, margins, font, and spacing
 - References: All references (journal articles, books) must be cited correctly in the specified format.
- **Project Presentations:**
 - **Presentations:** Students must present their project progress to faculty members and review panel members during scheduled reviews.
 - **Submission:** Soft copies of all presentation slides (PowerPoint/PPT) must be submitted to the project guide.
- **Project Documentation:**

The Project Coordinator shall maintain a separate file with following documents

 - Approved Project Synopsis
 - Project Review Schedule
 - Soft Copies of all presentation slides in Google Drive
 - Assessment marks for each review, along with the corresponding rubrics.

**Member Secretary-BOS****Chairman-BOS****Member Secretary-AC****Chairman-AC**

Course Details:

Class	Final Year B. Tech. Sem.-VIII		
Course Code and Course Title	2CVEL421, Internship		
Prerequisites	2CVEL311		
Teaching Scheme: Lecture/Tutorial/Practical	00/00/00		
Credits	10		
Evaluation Scheme:	T	ISE/ESE	-
	P	ISE/ESE	100/100

Course Outcomes (COs):

Upon successful completion of this course, the student will be able to:

2CVEL422_1	Apply core concepts of civil engineering to actively participate in real-world industry projects, related to design and construction.
2CVEL422_2	Analyze technical challenges in industry-based projects to identify root causes and propose feasible solutions considering sustainability and societal impact.
2CVEL422_3	Demonstrate technical skills, effective communication, and teamwork by collaborating with mentors, supervisors, and project teams to achieve project objectives.
2CVEL422_4	Evaluate the performance and functionality of tools, systems, or software through inspection, testing, and data analysis to ensure compliance with technical requirements and industry standards.
2CVEL422_5	Develop comprehensive project reports and technical presentations, highlighting problem statements, methodologies, technical contributions, and results to facilitate knowledge sharing with industry mentors and project stakeholders.

Course Contents:

INTERNSHIP:

This course aims to familiarize the students to the working culture in the industry and imbibe in them the competencies required to work in the industry. It is a minimum 12-week long course where the students are expected to work as interns the company. The student learning progress will be monitored by both industry mentor and the institute coordinator.

Conditions for students:

1. Students should be ready to move to the place where industry assignment is allotted.
2. The student has to go through the selection process of the company.
3. Maximum number of students will be decided based on the policy guidelines prepared from time to time.
4. Once the student is allotted to the company (after selection process), it will be binding on the student to complete the assignment in that company. No changes will be allowed thereafter.

Criteria for selection of company:

1. It should be a medium or large-scale industry having functional departments and facilities to design develop and manufacture the product or offer services and potential to recruit engineers after training.
2. Company should extend their facilities and guidance to the students for learning and also provide access to data and information for completing the assigned project.
3. Company should be able to keep record of attendance and provide a mentor to monitor the project and help the students to sort out problems if any.

Member Secretary-BOS

Chairman-BOS

Member Secretary-AC

Chairman-AC

Assignment:

1. After joining the industry students should learn all the departments and their workings. Furthermore, student should understand how each department of industry is interlinked with one another.
2. Student should correlate the theoretical aspects learned in academics with industry practices.
3. Students should gain knowledge about new technologies which industries use.
4. Students should follow the professional codes and ethics.
5. Students should follow all rules and regulations of industry. Special care should be taken regarding safety.

Work Diary:

1. Work Diary will be provided to each student, which contains details regarding internship, do's and don'ts and evaluation scheme.
2. Student is required to write the diary regularly and get it signed by the industry guide periodically.
3. During the visit of institute mentor, the student should be able to produce the same for writing the remarks/ instruction.

At the end of internship, student should submit the duly completed diary to the department.

Internship Requirements:

- All students are required to complete an internship at a research organization, university, or industry to gain practical exposure through meaningful projects that align with their academic learning. This internship must be approved by the Head of the Institution and has duration of a **minimum of 12 weeks and a maximum of 24 weeks**, as specified in the curriculum.
- The tables below represent the outline of the internship guidelines and student responsibilities: For detailed guidelines and procedures, refer to the Institute Internship Policy Document.

Internship Guidelines:

1. Request Letter	Obtain a request letter from the institute, signed by the Institute Director, addressed to the HR manager or relevant authority.
2. Confirmation Letter	Submit the confirmation letter from the industry or organization to the Internship Coordinator and Department Office.
3. Mentorship	A faculty member will act as a mentor for a group of students to monitor, evaluate, and guide their internship activities. The mentor will visit the internship location at least once or twice during the internship period and provide feedback to the Internship Coordinator.
4. Progress Reports	Submit progress reports every two weeks to the mentor, along with a final report to the Internship Coordinator.
5. Evaluation	The mentor and an assessment panel will evaluate student performance, post-internship, submitting an evaluation report to the Department Office.

6. Internship Certificate	Obtain and submit an Internship Certificate from the organization to the Internship Coordinator.
7. Presentation and Term Work	Deliver a presentation on internship work as part of term assessments; submit an internship diary and report for evaluation.

Student Responsibilities

Category	Responsibilities
Professionalism	Adherence to workplace rules, ethical conduct, professional communication
Engineering Skills	Apply engineering fundamentals, use tools and software, conduct experiments, solve problems
Industry Knowledge	Learn industry standards, observe practices, understand project management
Professional Development	Improve communication, teamwork, problem-solving, time management, build network, enhance employability
Learning & Growth	Seek learning opportunities, apply classroom knowledge, maintain a journal, gain insights into career paths

Internship Evaluation Process

The Internship of students will be assessed in three key stages:

1. Evaluation by Industry

- Punctuality
- Willingness to learn
- Daily diary maintains
- Skill test performance
- Supervisor's remarks

2. Evaluation by Faculty Mentor on Student performance and Internship Report

- Faculty Mentor will evaluate students based on their attendance, participation, and engagement during the internship.
- The quality and completeness of the internship report will also be assessed.

3. Seminar Presentation/Viva-Voce at the Institute

- Students will present a seminar based on their internship report before an expert committee formed by the relevant department, in accordance with institute norms.

The evaluation criteria for the seminar presentation will include:

- Quality of content presented
- Planning and organization of the presentation
- Effectiveness of delivery
- Depth of knowledge and skills demonstrated
- Attendance record, daily diary entries, and departmental reports will also be reviewed alongside the internship report.

This seminar presentation serves as an opportunity for students to share their knowledge and experiences with peers and faculty, enhancing their communication skills and building confidence.

Final Evaluation During the final evaluation, the student shall prepare and submit a report and give a presentation & Viva voce before his/her Department Committee at the college.

In-Semester Evaluation			
Criteria	Evaluated By	Weightage (%)	Description
Student Performance	Industry Supervisor	20%	Evaluated based on a rubric and feedback form, focusing on punctuality, eagerness to learn, skill tests, and professionalism
Submission of Internship Report with Certificate	Institute	20%	Assesses the quality, structure, and content of the report submitted by the student, reviewed by the mentor, along with the internship certificate.
Internship Diary, Attendance Record, and Industry-Faculty Interaction	Institute (During and End of Internship)	10%	Evaluates consistency and detail in maintaining the diary, adherence to attendance, and meaningful engagement during interactions with mentors.
Presentation, Demonstration, or Case Studies	Institute	20%	Assesses the student's ability to effectively communicate insights, demonstrate practical learning outcomes, or analyze and present case studies.
Viva-Voce	Institute	30%	Tests the student's depth of understanding, analytical skills, and ability to articulate their internship experience during an oral evaluation.
